

RADON DISCLAIMER

This Disclaimer is to certify that I have been alerted to the potential for a small risk of increased Radon levels in homes where weatherization measures will be installed. Weatherization achieves energy and cost savings and improved comfort, health and safety of homes through a variety of home retrofit measures, including some which improve the airtightness of the building.

Zones 1 and 2 Only: Precautionary Measures- Since your house is located in a zone identified as having moderate-to high-potential-radon levels, precautionary measures indicated below may be installed as part of weatherization:

- Exposed dirt floors covered and sealed
- Floor/foundation penetrations sealed
- Open sump pit capped
- Crawl space venting inspected and/or improved
- Basement isolated (air sealed) from living space

I am aware that weatherization may result in increased levels of radon, and that mechanical ventilation may counteract those increases. I have received the Environmental Protection Agency's (EPA's) "A Citizen's Guide to Radon," and radon-related risks were discussed. I have chosen to go forward with weatherization, and accept all risks of injury or damages.

I have carefully read this informed consent form and have signed it of my own free will.
