

**Weatherization Guidance No. 40**

**Effective Date: March 20, 2018**

**Updated: April 1, 2022**

### **Connecticut Weatherization Assistance Program Guidance on Radon**

The purpose of this guidance is to instruct the subgrantees on updated policy and procedures related to weatherization of homes based upon DOE WAP Guidance WPN 22-7 concerning Radon. If a household is determined to be situated in a EPA Zone 1 or 2 and/or potential sources of Radon infiltration have been identified during the audit the auditor is to provide all client's with a print version of **EPA's "A Citizen's Guide To Radon"**, utilize Form #41 "Radon Disclaimer", informing them that Weatherization Assistance Program service delivery may result in increased levels of Radon in the household.

### **Reporting Requirements for Radon**

Due to recommendations by the Department of Energy the Connecticut Weatherization Assistance Program has developed the following form for use by all Weatherization Assistance Program subgrantees. Any questions or concerns regarding this guidance and the associated reporting and client education are to be directed to: [DEEP.Weatherization@ct.gov](mailto:DEEP.Weatherization@ct.gov)
