A&M SERVICE STATION)	
)	

- A. With the agreement of A&M Service Station ("Respondent"), the Commissioner of Energy and Environmental Protection ("Commissioner") finds the following:
1. Respondent owns, leases, operates, or controls a gasoline dispensing facility ("facility") at 117 North Main Street in Branford, Connecticut.
 2. At the facility, gasoline is dispensed from the stationary storage tank(s) into the fuel tanks of motor vehicles. Such gasoline is transferred using a *Stage II vapor recovery system* ("Stage II system"). A properly operating Stage II system is required by Section 22a-174-30(b)(5) of the Regulations of Connecticut State Agencies ("Regulations").
 3. Pursuant to Section 22a-174-30(e)(2) of the Regulations, a Stage II test is required to be conducted and approved to verify that the Stage II system is properly operating.
 4. Pursuant to Section 22a-174-30(e)(4) of the Regulations, a station that has not passed the Stage II test is not considered to be properly operating.
 5. The Respondent was required to conduct and pass such testing requirements by January 25th, 2011.
 6. The Respondent conducted and passed a Stage II test on August 25th, 2011; therefore, the test was approximately eight (8) months late.
 7. At the facility, gasoline is also transferred between fuel delivery vehicle(s) and stationary storage tank(s) using a *Stage I vapor recovery system*; as it is defined in Section 22a-174-30(a)(8) of the Regulations.
 8. Pursuant to Section 22a-174-30(c)(6)(A) of the Regulations, "...no owner or operator of a gasoline-dispensing facility shall transfer or allow the transfer of gasoline between a delivery vehicle and a stationary storage tank unless each stationary storage tank is equipped with a CARB-certified fill adapter". This equipment was required to be installed by May 10th, 2005.

9. Pursuant to Section 22a-174-30(c)(7) of the Regulations, “a two-point Stage I vapor recovery system shall be installed by the owner or operator of any stationary storage tank with an available port...”. This equipment was required to be installed by May 10th, 2005.
 10. Pursuant to Section 22a-174-20(a)(3) of the Regulations, “No “person” shall place, store, or hold in any stationary storage vessel of more than 250-gallon capacity any “volatile organic compound” with a vapor pressure of 1.5 pounds per square inch or greater under actual storage conditions unless such vessel is equipped with a permanent “submerged fill pipe” with a discharge point eighteen (18) inches or less from the bottom of the storage vessel...”
 11. A January 24th, 2011 inspection by Kathleen Rankin, of the Department’s Air Engineering & Enforcement Division, revealed that the Respondent had not installed, on their stationary storage tank(s), the vapor recovery equipment specified in paragraphs A.8., A.9., & A.10. of this Consent Order. As a result, Notice of Violation (“NOV”) No. 16680 was issued to the Respondent on February 25th, 2011 for violating Section 22a-174-30(c)(6)(A) and Section 22a-174-30(c)(7) of the Regulations.
 12. By virtue of the above, the Respondent violated Section 22a-174-30(b)(5), Section 22a-174-30(c)(6)(A), Section 22a-174-30(c)(7), Section 22a-174-30(e)(2), Section 22a-174-20(a)(3), and Section 22a-174-30(e)(4) of the Regulations.
 13. By agreeing to the issuance of this Consent Order, the Respondent makes no admission of fact or law with respect to the matters addressed herein other than Paragraphs A.1 and A.2.
- B. With the agreement of the Respondent, the Commissioner, pursuant to Sections 22a-6, 22a-171, 22a-174, 22a-177, and 22a-178 of the Connecticut General Statutes, orders as follows:

 4. Approvals. The Respondent shall use best efforts to submit to the Commissioner all documents required by this Order in a complete and approvable form.
