SOUTHBURY TRAINING SCHOOL

A. With the agreement of Southbury Training School (Respondent), the Commissioner of Energy and Environmental Protection (Commissioner) finds the following:

1. The Respondent owns and operates numerous boilers and emergency engines on its campus located at 135 South Main Street, Southbury, CT (premises).
2. The premises is located in a serious non-attainment area for ozone as defined by Section 22a-174-1(103) of the Regulations of Connecticut State Agencies (RCSA).
3. As defined by RCSA Section 22a-174-33(a)(10)(F) and Section 22a-174-26(d)(1)(B), a premises located in a serious nonattainment area for ozone that has the potential to emit (PTE) fifty tons per year or more of Nitrogen Oxide (NOx) is a Title V source. Pursuant to RCSA Section 22a-174-33(c)(1), a Title V source is subject to the requirements of RCSA Section 22a-174-33.
4. Pursuant to RCSA Section 22a-174-33(f)(2), the owner or operator of a Title V source shall apply for a Title V permit within ninety (90) days of receipt of notice from the commissioner that such application is required or twelve (12) months after becoming subject to this section, whichever is earlier.
5. Pursuant to RCSA Section 22a-174-33(d)(1), in lieu of requiring an owner or operator of a Title V source to obtain a Title V permit, the Commissioner may, by permit or by order, limit all aggregate potential emissions of regulated air pollutants from such premises to less than the major source thresholds.
6. On March 24, 2011, the Respondent was issued a registration authorizing the Respondent to operate the premises in accordance with the General Permit to Limit Potential to Emit (GPLPE) issued on November 19, 2010 (2010 GPLPE). Until the permit expired on November 19, 2015, the 2010 GPLPE limited all aggregate potential emissions of regulated air pollutants from the premises to less than the amounts specified in RCSA Section 22a-174-33(d)(1).

Date Issued: 5/29/2019

7. The Respondent failed to apply for coverage under the GPLPE issued on November 9, 2015 (2015 GPLPE) prior to the expiration of the 2010 GPLPE. Since the Respondent's PTE for the premises was no longer capped when the 2010 GPLPE expired on November 19, 2015, the Respondent became subject to Title V permitting requirements on that date and was required to apply for a Title V permit on or before November 19, 2016.
 8. The Respondent failed to apply for a Title V permit on or before November 19, 2016.
 9. During an inspection of the premises conducted on February 6, 2017, the field engineer determined that the Respondent had a PTE for NOx in excess of 50 tons per year and was operating a Title V source without applying for a Title V permit since November 19, 2015, the date when the 2010 GPLPE expired. As a result, the Commissioner issued Notice of Violation #17813 alleging that the Respondent violated RCSA Section 22a-174-33(f)(2) by failing to obtain a Title V permit.
 10. On July 25, 2017, the Respondent submitted an application (Application #201705795) for registration under the 2015 GPLPE. The Commissioner issued a registration authorizing the Respondent to operate the premises in accordance with the 2015 GPLPE on August 22, 2017.
 11. Pursuant to RCSA Section 22a-174-26(d)(2), the owner or operator of a Title V source is required to pay an emission fee each year to the Department, due by July 1 each year, based on the emissions during the previous calendar year.
 12. The Respondent failed to pay emissions fees for calendar years 2016 and 2017 in violation of RCSA Section 22a-174-26(d)(2).
 13. By virtue of the above, the Respondent has violated Sections 22a-174-26(d)(2) and 22a-174-33(f)(2).
- B. With the agreement of Respondent, the Commissioner, acting under §22a-6 and §22a-174 of Connecticut General Statute, orders the Respondent as follows:
