2. On December 27, 2017, Solid Waste Permit to Construct and Operate No. 10601279-PCO (“PCO”) was issued to Respondent to construct and operate a solid waste volume reduction plant (“the Facility”). Permitted activities at the Facility are associated with the storage and processing of construction and demolition debris (“C&D”), paper, cardboard, scrap metal, commingled recyclable items, scrap tires and clean wood.
3. On March 14, 2019, the Department of Energy and Environmental Protection, (“the Department”) Waste Engineering and Enforcement Division conducted a file review. Based upon the file review, the Department found the following violations:

  - e. Failure to conduct quarterly compliance audit inspections and submit compliance audit reports to the Department, as required by PCO paragraphs A.3., C.16., and RCSA § 22a-209-4(e), for all four quarters each year from 2014 to 2018.

4. On May 26, 2019, the Department issued Notice of Violation No. WSWDS19011 ("NOV") to Respondent requiring correction of the violations cited in paragraph A.3. of this Consent Order.
  5. In response to the NOV, Respondent submitted correspondence dated April 15, 2019, May 3, 2019, and June 12, 2019 with documentation asserting correction of the violations identified in paragraph A.3.b. above. However, the Respondent remains out of compliance with violations identified in paragraphs A.3.a., A.3.c., A.3.d., A.3.e. above.
  6. By virtue of the above, Respondent has violated the PCO, and RCSA §§ 22a-209-4(e), 22a-209-4(i), and 22a-209-10(4).

Within ten (10) days after retaining any qualified consultant(s) other than one originally identified and approved under this paragraph, the Respondents shall notify the Commissioner in writing of the identity of and receive written approval of such other qualified consultant(s) from the Commissioner. In order to seek approval of a qualified consultant(s), Respondents shall submit to the Commissioner a description of a qualified consultant(s)' education, experience and training which is relevant to the work required by this Consent Order. The consultant(s) retained to prepare the documents and implement or oversee the actions required by this Consent Order must be an independent, registered professional engineer in the State of Connecticut ("P.E.") and must provide professional services in accordance with the Solid Waste Management Regulations. ## Business Recycling Profile

In Connecticut, recycling is mandatory. Connecticut General Statutes and the Regulations of Connecticut State Agencies require designated items to be recycled by everyone. Every resident, business, government facility, school, college, hospital, institution, etc. is required by law to recycle glass & metal food and beverage containers, plastic containers #1 and #2, boxboard, corrugated cardboard, magazines, newspapers, white office paper, colored office paper, scrap metal, Ni-Cd rechargeable batteries, used crankcase oil, lead acid batteries, leaves and grass clippings.

Recycling these items is a critical action we can all take to move the State towards achieving our recycling rate of 60% by 2024 as stated in the 2016 [Comprehensive Materials Management Strategy](#). Complying with the state recycling laws has tremendous environmental benefits such as conserving natural resources, reducing pollutants emitted to our air and water; conserving energy, reducing greenhouse gas emissions, and eliminating the need for new solid waste disposal facilities.

This form is a guidance document to help businesses better manage their recycling program and increase recovery efforts. This form does not need to be submitted to the Connecticut Department of Energy and Environmental Protection (DEEP) unless it is requested, in response to an inspection and/or an enforcement action. For more recycling resources please visit our [Business Recycling Resources webpage](#).

<b>EXAMPLE:</b> OFFICE PAPER (White and other paper combined)	One 40-gallon wheeled cart/week	Everyone collects at their desk; brought to central location (large wheeled cart near elevators). Janitor brings to loading dock when it is full (about once a week)	Our current trash hauler, (NAME) empties our paper recycling wheeled cart 2x/month (we call them as-needed) and material is taken to a permitted recycling facility (PERMITTEE NAME) in (TOWN).

EXAMPLE: Old Corrugated Cardboard	We have a 4-yard dumpster behind our main warehouse. It's picked up twice a week.	Warehouse staff collect and flatten boxes as we go along. A small pile is created during a shift (we have 3 shifts/day). At the end of the shift an employee removes the small pile and brings to dumpster outside. ## Part V: Recycling & Recovery Programs Planned

Please use the table below to describe future recycling efforts and how compliance with the mandatory items, if not already recovered for recycling, will be achieved.

IDEA / MATERIAL	ESTIMATED GENERATION RATE	HOW AND WHERE WILL THE MATERIAL BE COLLECTED?	WHO WILL PICK-UP THIS MATERIAL? FINAL/END MARKET?	WHEN WILL PROGRAM BE IMPLEMENTED?
EXAMPLE: Food and Beverage containers (glass, metal and plastic)	25 gallons/month	Will place barrel in break room; janitorial staff will empty and remove materials to a larger container on our loading dock.	There are a lot of 5¢ deposit containers. We're looking into having a local non-profit organization collect them for free and redeem the deposits.	We will start this program by August 8, 2008 (2 weeks from now).
EXAMPLE: 55 gallon drums	10/week	We generate 55 gallon drums, which contained non-hazardous substances. We stockpile them outside the plant until we have 50 drums.	Working with XYZ, a company that reconditions the drums. We've found this to be more cost effective than recycling them at this time.	We've already started collecting and expect our first pick up to be next week (June 5, 2008)

**Part V: Recycling & Recovery Programs Planned (continued)**

IDEA / MATERIAL	ESTIMATED GENERATION RATE	HOW AND WHERE WILL THE MATERIAL BE COLLECTED?	WHO WILL PICK-UP THIS MATERIAL? FINAL/END MARKET?	WHEN WILL PROGRAM BE IMPLEMENTED?
<i>EXAMPLE: 5 gallon buckets</i>	<i>15-30 <u>buckets</u>/month</i>	<i>We generate buckets (<u>contained non-hazardous substances</u>) and cannot use them. Will rinse and stack (with lids) off to side of loading dock.</i>	<i>We're trying to secure a connection with a local reuse center or distribute via materials exchange program.</i>	<i>We hope to start this program by <u>the end of August 2008</u>.</i>
