

Fisheries Division
Freshwater Trophy Fish Award Summary
Catch and Release Category
1965 through 2025
January 2026

This document is published annually, starting in 2025, to provide a record of CT DEEP Fisheries Division's Trophy Fish Award program, which was initiated in April 1965¹. The Fisheries Division started the program to *1. Acknowledge anglers for a significant catch and 2. For the Fisheries Division to obtain information on very large fish, which may not be collected using normal biological sampling gear*. A catch qualifies as a trophy fish by meeting the minimum length for the species. All criteria and rules can be found on the Angler Recognition Web Page at <https://portal.ct.gov/DEEP-Trophy-Fish-Awards>

The information included in this document was obtained through the merger of several databases, which were populated from angler affidavits and historical records. Anglers are encouraged to notify the Fisheries Division of any possible errors.

From the onset of the program until 2019 there was only one category- "harvest". This required anglers to keep the fish and save it so that biologists could verify the identification and weight of the fish (if needed). Since the 1980's a growing number of anglers have preferred to release their catches and not to harvest large fish. Based on this trend, the Fisheries Division began a second category, "Catch and Release". The Catch and Release category is based on the length of the fish. In combing through the historical data, it was noted that some anglers had submitted fish, which were later released, as there were only length and no weights. These fish were added to this Catch and Release document to preserve the information.

All angler applications can be submitted using the Fisheries Divisions online form, which is available on the angler recognition webpage.

For more about the history of this program view the article in [Connecticut Wildlife May/June 2019](#).

Deep.inland.fisheries@ct.gov

¹ Prior to April 1965 only information on the state record (largest fish by weight) was kept. These records were incorporated into the "Harvest" document.

Fish	Inches	Where Caught	Date	First Name	Last Name
American Eel	41.00	Farmington River	05/11/24	Daniel	Hanscom
