## Shortfin Mako Possession limit set at Zero for all fisheries

## **NOTICE**

Effective 0001 hours, Tuesday, July 5, 2022, the landing and possession limit for the recreational and commercial fisheries for shortfin make sharks will be zero. Commercial and recreational fishermen (including those fishing in tournaments or on for-hire vessels) must release any shortfin make sharks captured, whether the shark is dead or alive at haulback.

NOAA Fisheries published its final rule in the Federal Register today, Friday, July 1, 2022. This final rule establishes a shortfin make shark retention limit of zero in the commercial and recreational fisheries consistent with the management measure adopted in 2021 by the International Commission for the Conservation of Atlantic Tunas (ICCAT). If ICCAT provides for U.S. harvest in the future, NOAA Fisheries could increase the shortfin make shark retention limit, based on regulatory criteria and the amount of retention allowed by ICCAT. Until that happens, the retention limit will remain at zero.

For further information, see the NOAA Fisheries website at: Zero Atlantic Shortfin Mako Shark Retention Limit | NOAA Fisheries

The Connecticut Department of Energy and Environmental Protection is an Affirmative Action/Equal Opportunity Employer that is committed to complying with the requirements of the Americans with Disabilities Act. If you are seeking a communication aid or service, have limited proficiency in English, wish to file an ADA or Title VI discrimination complaint, or require some other accommodation, including equipment to facilitate virtual participation, please contact us at 860-418-5910 or by email at deep.accommodations@ct.gov. Any person needing an accommodation for hearing impairment may call the State of Connecticut relay number - 711. In order to facilitate efforts to provide an accommodation, please request. all accommodations as soon as possible following notice of any agency hearing, meeting, program, or event.
