Creaser Camp Coventry.

The Department of Energy and Environmental Protection continues to work toward restoring unencumbered fishing access to the Skungamaug River in the vicinity of Woodbridge Road in Coventry. Until such time, DEEP has temporarily suspended public use of an existing easement located at 80 Woodbridge Road. Stocking the waters of the Skungamaug River downstream of the Woodbridge Road bridge has also been suspended until public use is restored. Use of the easement for purposes of fisheries research and management actions by DEEP staff will continue. We encourage patience on the part of the fishing public while this matter is resolved and access for fishing restored. For alternate fishing locations on the Skungamaug and other nearby streams, please visit [Trout Stocking Maps \(ct.gov\)](http://Trout Stocking Maps (ct.gov)), which provides links to the Interactive Trout Stocking Map and PDF maps of stocked rivers/stream.
