

PERMITTING TIMEFRAMES

Businesses are not the only beneficiaries of a more predictable approval timeframe – all stakeholders win from having a clear outlook on how long a given process should take. Internally, targeting timeframes and tracking permit outcomes help DEEP’s committed environmental professionals identify areas where process improvements, innovations, or additional resources may be necessary.

The types of permits DEEP issues are categorized into four different permitting timeframes – immediate, within 3, 6 or 12 months – based upon the following four factors: extent of review; public notice requirements; level of potential risk to the environment; and technical complexity.

Expected Permitting Timeframes

EXTENT OF REVIEW

How much review is needed to conduct the permitting process?

NO TO MINIMAL REVIEW	LIMITED REVIEW	SIGNIFICANT REVIEW	EXTENSIVE REVIEW AND ANALYSIS
----------------------	----------------	--------------------	-------------------------------

PUBLIC PROCESS

To what extent is public process required?

NONE	COMPLETE PRIOR TO APPLICATION	PUBLIC NOTICE LIKELY REQUIRED	PUBLIC NOTICE REQUIRED
------	-------------------------------	-------------------------------	------------------------

POTENTIAL RISK
