Our Goal

The main goal of the Pesticide Management Program is to prevent adverse human health or environmetal effects from the misuse of pesticides.

What do we do?

- Certify and renew applicators for applying pesticides
- Register businesses and pesticide products
- Enforce the statutes and regulations regarding pesticides
- Provide information and assistance within the scope of our program
- Process and issue permits
- Make continuing education and training materials accessible

Feel free to email us with any questions at deep.pesticideprogram@ct.gov

Or check out or website at
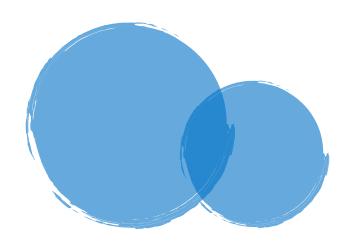

Portal.ct.gov/deep-pmp

Pesticide Management Program
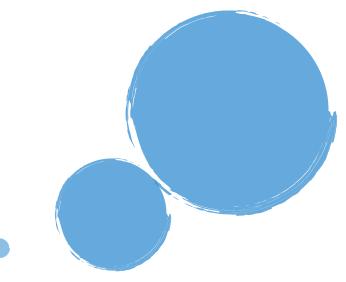

Homeowners and General Public

Who needs to be certified?

Anyone who applies pesticides, general or restricted use (including organic pesticides), in a commercial capacity, a person who wants to use restricted use products on their property or their employers property or to produce agricultural commodities, and anyone practicing aboriculture even without the use of pesticides.

How to look up a license?

Go to elicense.ct.gov and click online services, and then generate roster(s). Here you can select the information you want to search for. You can search for information such as certified supervisors, or restricted use pesticides.

What is a pesticide?

Any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest.

What kinds of pests can be controlled?

There are all kinds of pests that fall under the pesticide program such as: insects, weeds, and bacteria just to name a few. Pesticides can also be used to control other issues such as lawn diseases and invasive species.

Want to know what pesticides are being sprayed at properties abutting yours?

You can sign up to be on the abutters list. Check on our website for how to submit your information annually to be on this. Then a company who is going to be applying pesticides to properties directly abutting yours will notify you at least 24 hours ahead of time.
