Subject: Survey to assist with drafting recommendations and advice

Good morning Working Group members,

Thank you for participating in our last meeting. For those that were present, you know that we did not have time to further discuss refining the charge for the Working Group Drafting Team, which is generally is charged with drafting the Working Group's advice and recommendations to DEEP on the first phase subcommittee concept papers.

The Working Group has a strong starting point with its first five concept papers. Additional refinement is occurring through the two Ad Hoc Teams discussing *Historical Fill & Anthropogenic Background and Releases on Residential Properties*.

As promised in our meeting, DEEP has put together a survey (see link below) that is designed to aid the Working Group's Drafting Team in understanding the opinions of the Working Group as it looks to complete the synthesis of the Ad Hoc Team work with the existing concept papers and other thoughts of Working Group members and cohort groups. Significant progress has been made thus far on the concept papers completed in June.

Please complete this survey to help the Working Group members that volunteered to be on the Drafting Team: <https://www.surveymonkey.com/r/AdHocSummarySurvey>.

We continue to be impressed with your commitment and support of this important process.

Sincerely,
Katie and David

Katie S. Dykes
