REACT User Guide Overview

The CT DEEP REACT system allows Remediation sites and reportable releases, either new spills or newly discovered historical releases, to be tracked in a consistent manner to better document the investigation and cleanup process. This consolidated system for all reportable releases tracks what is being done to protect human health and the environment and provide clarity for buyers of properties and their lenders, as well as neighboring property owners and community members.

This is a dynamic document that will be supplemented as additional instructions and responses to frequent questions indicate a need for revision.

Goals

- Ensure **public transparency**
- Modern **user experience**
- Streamlined **case management workflows** from creating cases and immediate actions through remediation and long-term stewardship
- **Improve communication** between property owners, their representatives, and DEEP staff
- **Reduce paperwork**

Components

Public Portal – Authenticated registered users (Property owners, LEPS, PEPs, attorneys...) can create **Cases, Schedules, Milestones, Submittals**, and make **ePayments**.

Public users (realtors, researchers...) can view all, though not create cases.

Staff Portal – DEEP Staff work in the portal to manage **Cases, Schedules, Milestones, Submittals**, and **Payments**.

Tip: Do **not** use the Edge feature to "Install this site as an app". The forward and back buttons and tabs disappear, so once you navigate away from a page, there is no way to go back and you have to start over. It's best to launch REACT directly in your browser.

Public Home Page

Public facing feature – no fees, signing up, or logging in needed to search or view information.

REACT Public Search Choices

Search for properties with a map, create a custom report of cases (releases to the environment) in your town, or view all cases sorted by town. These three options are **available** to the public **without a CT.GOV account**, are anonymous, and are available at <https://deep-react.service.ct.gov/s/>

Search for Properties

Tip: If you have trouble searching for sites, try clearing your browser's cache [browsing history] or try a different browser.

Searches for particular properties may be done in two ways:

1. On the map, drag and scroll to the area you want to see. Either use the + icon at the upper left corner of the map or scroll up until you clearly see triangles and click on a triangle to see the address. The selected triangle is purple and the others are yellow. Cases at that address will appear below the map, however, the cursor must be off of the map to scroll down.
2. Type the address or partial address into the search box to the right. A list will appear under the search box where you can select an address. A blue raindrop icon will appear at the selected address and triangles showing the location of reported releases or properties will appear. Cases at that address will appear below the map however, the cursor must be **off of the map** to scroll down.

Search by Map

Search for Sites by entering an address or selecting a site on the map. To see additional geospatial information you may go to the "DEEP Cleanup Comprehensive Map Viewer" ArcGIS tool on DEEP's website.

What's in My Town?

By choosing this blue button, the user may create a list of cases in a single Connecticut town, by selecting the town.

When you click on a REACT Case Number (“DCN-#####”) to obtain more specific information, it will open in a separate tab. Any blue underlined text is a link to additional information and using the back arrow will take you back to the previous screen, but will leave the tab open (except clicking on the address will open Google Maps in a new tab).

To go back to the page listing case numbers, click on the “GIS Search” tab at the top.

REACT Terminology

REACT is a portal, not a regulatory program.

- **REACT** is a **bookshelf**.
- **Sites** are the **books** on the bookshelf, the place on the earth.
- **Cases** are the **chapters** within the books, the individual programmatic requirements.

REACT Terms

- **Site** -the geographic location of a property or release that is being cleaned up. A Site can have multiple Cases. A Site can be one parcel or can consist of multiple parcels.
- **Case** – a set of programmatic requirements compelling environmental cleanup.
- **Milestones** - Regulatory or statutory requirements that have associated tasks or actions necessary for a case to progress.
- **Regulated entity** – Person (Including partnership, association, firm, limited liability company, corporation or other entity, state, federal, or municipal government, or any responsible corporate officer) who is responsible for achieving compliance with regulatory and statutory requirements. This can vary by case type. More than one regulated entity can be associated with a Case or Site. An attorney or consultant is a representative of the Regulated Entity, not the Regulated Entity itself.
- **Author** – The person who signed or, if there is more than one signature, approved the document being uploaded.
- **Submitter** – Person who uploads a document into REACT. Submitting a document does not make the Submitter a Regulated Entity if they are submitting on behalf of the Regulated Entity.
- **Primary Parcel** - The primary parcel is the property being investigated. The case address is associated with this parcel, though does not need to be an exact match with the address that the town uses.
Associated Parcels - are optional, and may be selected if more than one parcel makes up a Site, for example, to indicate for a redevelopment project that multiple parcels are being cleaned up together.
- **Release Parcels** – are optional, to indicate where a release occurred if it is not the primary parcel .

Program/Case Type

DEEP EQ Programs/Cases in REACT:

- o Abandoned Brownfield Cleanup (ABC) Program
- o Brownfield Remediation and Revitalization Program (BRRP)
- o Municipal Brownfield Liability Relief (MBLR) Program
- o Cost Recovery
- o Enforcement
- o General Inspection (any and all other inspection types other than for UST Closure or PCB)
- o UST Closure Inspection
- o PCB Inspection*
- o PCB releases not to land or water**
- o PCB in building materials***
- o Leaking Underground Storage Tanks (Regulated Tanks)
- o Property Transfer Program (PTP)
- o RCRA Hazardous Waste Cleanup (Corrective Action)
- o Release-Based Cleanup Program, both ERR and Existing Releases
- o Significant Environmental Hazards
- o State-Funded Remediation
- o Federal Remediation (CERCLIS National Priority List “Superfund,” Non-NPL CERCLIS)
- o Voluntary Program CGS 22a-133x
- o Voluntary Parcel-Wide Cleanup Program (CGS 22a-133y as of March 1, 2026)
- o Voluntary Program CGS 22a-133y (legacy, prior to March 1, 2026)

Note: For cases that were initiated with DEEP prior to March 1, 2026, data was migrated to the REACT platform to allow continuity of use. Data reconciliation is ongoing to address legacy database and data migration constraints. Please contact DEEP.REACT@ct.gov if you see unexpected information.

Case Type Descriptions

- *PCB Inspection
 - o PCB inspection cases are performed by DEEP Staff, so this case type can only be created by DEEP. These are usually unannounced inspections on behalf of the EPA. As a result, they start as confidential (not shown to the public or Authenticated Users) and may stay that way at the discretion of DEEP.
- **PCB Releases not to Land or Waters
 - o This case type is for PCB cases **that are required to be reported to dispatch**, but are not in the release-based program. These are releases that do not impact

the land and waters of the state, but are required to be remediated. A PCB Release not to Land or Waters case can only be created by DEEP Staff.

- ***PCB in building materials
 - This case type is for PCB cases where PCBs have been identified in building materials and the impacted material does not have contact with the lands and waters of the state of Connecticut. PCB in Building Materials Cases can be created by both DEEP Staff and Authenticated Users. As this case type is not considered a release-based case, it is under the “Sitewide” Program type in the case creation process.

Authenticated Users

To Become an Authenticated User

A CT.GOV account is required to be an Authenticated User. Click on the “Sign in” words at the top right of the [public portal page](#).

Tip: You may have more than one CT.Gov account if you choose (e.g. personal and professional). You do **not** need a different CT.Gov account for each client you serve. You can use your account across state agencies.

This will bring you to an account creation page where you will create a username, identify the email you will be using for the account, and you will select a multi-factor authentication method.

When logging into the portal, you will get a message asking whether to send an authentication code to your telephone, text, email, or Authenticator for the 2-Factor Authentication. Select one and enter or paste the code into the page and click **Verify** or follow the instructions on your Authenticator app. You can “manage your account” [update your email, change your 2-Factor Authentication method, etc.] by clicking on the profile icon in the upper right hand corner when you are logged in. 

All Program Self-Certification for Authenticated User in the REACT System

Once you have signed in through CT.GOV you will reach the following screen for Authenticated Users. You must read and agree to these conditions to be able to work within REACT by clicking the box at the lower left of the screen and clicking “Submit” at the lower right.

This self-certification covers multiple programs and is used every time an Authenticated User enters REACT. Once in REACT the User will be able to move among the cases they are affiliated with and this certification will apply. This avoids having to re-enter a certification submission every time the User moves among programs serviced by REACT and is intended to save time. If the language is revised an updated date will be noted.

release, mitigation, cleanup, and monitoring of releases to the environment. The system provides tracking of progress milestones and DEEP responses to cleanup activities.

NOTICE:

In accessing this information system, you acknowledge that you fully understand and consent to the following:

1. You are accessing a Connecticut government information system that is provided for official government purposes only;
2. Unauthorized access to or use of government information systems or information is subject to criminal, civil, administrative, or other lawful action;
3. You have no reasonable expectation of privacy regarding any communications or information used, transmitted, or stored on this information system; and
4. Any communications or information transmitted to or stored on this information system are public records, subject to confidentiality and disclosure limitations as required and permitted by state and federal law.

I further understand and agree that:

5. It is my responsibility to notify Connecticut DEEP through the settings in this system if there is any change in my role or status that affects my authorization to submit electronic records using my account on behalf of any other person, entity, or organization;
6. It is my responsibility to timely review the e-mail and on-screen acknowledgements and copies of electronic records submitted and received through my account to Connecticut DEEP;
7. In no event will Connecticut DEEP be liable to me, my employer, or my client for any special, consequential, indirect or similar damages, including any lost profits or lost data arising out of the use or inability to use the software or of any data supplied therewith even if Connecticut DEEP or anyone else has been advised of the possibility of such damages, or for any claim by any other party.
8. The Connecticut DEEP disclaims all warranties, express or implied, including but not limited to implied warranties of merchantability and fitness for a particular purpose, with respect to the software and the accompanying written materials.

Regarding any records or information that I submit:

9. I certify that based on reasonable reliance upon the individuals responsible for obtaining the submitted documents and information, to the best of my knowledge, I have no reason to believe the submitted information is false, inaccurate, incomplete or misleading, at the time of formal submission to the Department.
10. I understand that a false statement in the submitted information may be punishable as a criminal offense, in accordance with section 22a-6 of the General Statutes, pursuant to section 53a-157b of the General Statutes, and in accordance with any other applicable statute.

How To Create a Case in REACT

From the Home page, select **Create a New Case**.

Acknowledging Release Reporting

When creating a case in REACT, the Authenticated User must acknowledge that verbal reporting is **not** required for the release in question.

DEEP staff will add Emergent Reportable Releases reported to dispatch into REACT. Authenticated Users will be able to add information to their case later, usually the following day.

IMPORTANT: Releases subject to the Release Reporting Regulations, UST Regulations, or imminent hazards to public health and/or the environment must be reported to dispatch at **1-866-DEP-SPIL (1-866-337-7745)** or **860-424-3338** to make sure the condition reaches the correct professionals in a timely manner.

Review Summary

This online portal is for reporting non-emergency incidents and managing all cleanup cases once reported.

Call CT DEEP Dispatch at 860-424-3338 or 1-866-337-7745 (1-866-DEP-SPIL) to report sudden releases (spills) or other hazardous incidents, including for these conditions:

1. a *new* release subject to Release Reporting Regulations?
2. a release that occurred at any time from any *underground storage tank*?
3. an emergency condition that poses an *actual or potential threat* to human health, public safety, and/or the environment?

For example:

- Actual or potential need for evacuation
- Imminent risk of explosion
- Visible impact to surface water or visible fish kill
- Non-Aqueous Phase Liquid present in public or private drinking water supply well(s)
- Imminent risk of groundwater polluted with Non-Aqueous Phase Liquid to impact public or private drinking water supply well(s)

If the release has already been reported to Dispatch and is subject to the Release Reporting Regulations, please navigate to the Search tab, as a case has been or will be created. You do not need to create the case. If the case cannot be located, please contact DEEP.REACT@ct.gov.

☐ By continuing, you are acknowledging that you are reporting a release or condition that does not require a verbal report (phone call to Dispatch).

Cancel

Begin

Select Program Type

Select either Release-Based or Sitewide. Once that selection is made, the options are tailored for case resolution to follow the various programmatic requirements.

Note: Authorized User connections will **log out if idle for 15 minutes.**

In many instances, there will be multiple cases associated with one property and these may require coordinated resolution. REACT will allow the User to associate submittals to multiple cases in multiple programs, but each case needs to be created first. Case initiation itself will handle only one type of program at a time.

The screenshot shows the 'Select Program Type' screen within the DEEP Protection Portal. The top navigation bar includes the CT.GOV logo, the Department of Energy and Environmental Protection Portal name, a search bar, and links for Home, Search, Sites, Cases, Submittals, Milestones, Chemicals, Reports, and Payments. A left sidebar lists the workflow steps: Acknowledge Release Reporting (completed), Select Program Type (active), Select Site, Select Parcel(s), Add Affiliations, Add Contacts, Enter Environmental Setting, Enter Environmental Concern, and Review Summary. The main content area is titled 'Program Type' with the instruction 'Select the program type you are submitting information for today.' Below this, a 'Select Program Type' heading is followed by two selectable options: 'Release-Based' (with a green icon of a document and a checkmark, and the text 'I want to enroll in a Release-Based Cleanup program') and 'Sitewide' (with a green icon of a map and a checkmark, and the text 'I want to enroll in a Sitewide Remediation program'). A note at the bottom states: 'Select "Sitewide" for Voluntary Parcel-Wide Cleanup and all other cases except Release-Based Cleanup.' At the bottom of the form are 'Cancel' and 'Next' buttons.

Choose an Existing Site or Add a New Site

Type the address in “Search by Address or Coordinates” box on the upper right-hand corner of the GIS map to determine if the site is already in the system. The preference is for the User to choose an existing location, which will allow previous information for that site to more easily be linked and some information to be autopopulated. If a location is not in the REACT system there is an option to “Add New Site.” The choice of sites includes sites that have permitting or enforcement activities with DEEP in addition to cleanup sites. Selecting an existing site prevents duplicates.

- If the site is already in the system:
 - There will be a yellow triangle at the address you entered. (Click on the yellow triangle to make sure the address matches the incident address – the triangle will turn purple.)
 - If the purple triangle is the correct address click the blue **Next** button at the bottom right-hand corner of the screen. You may even find that the case you intended to create already exists-if so, don't create a new site or case and instead manage information on the existing case.
 - If the address associated with purple triangle is not for your site or if there is no triangle at your address that means the site is not yet in the system.

- Add a new site if the site is not in the system:
 - Scroll to the bottom on the page and click the blue **Add New Site if Not Found** in the center of the page.

Enter the site name on this page for new site. Make sure the address is correct. Select **Next**.

Location Information

Site Map

*** Site Name**

Error: Site Name is required.

Address

Official Town

Zip Code

Latitude

Longitude

Once the site is identified the user moves on to selecting a parcel.

- o Click on an area on the map, and the parcel will be highlighted and a box with parcel information will appear on left side of the screen.
- o If the associated parcel selected is the release area, check the release box within the parcel information box. To remove a selected parcel, click the x on the upper right-hand corner of the parcel information box.

Parcel(s)

Click on a parcel to select, and add it to the parcel list. Selected parcels will appear on the left with their ID, Address, and Town. If a Primary Parcel wasn't already on the list, you must check the Primary Parcel box to choose one from your selected parcels. The Primary Parcel's address will be the address for the Case. You may also identify an Associated Parcel if it is being managed as part of the Case. For Release-Based Cases, select a Release Parcel if it is different than the Primary Parcel by clicking the button with the map marker and then placing it on your Release Parcel. You may also use the checkbox available within the parcel list.

Primary Parcel

Parcel ID: 064_10659

Address: 75 ELM ST

Town Name: Hartford

Primary: ☒

Show Release Area (optional)

- **If the release area on the parcel is known:**
 - Select the raindrop icon (under the plus and minus on the left side of the map), and drag and drop it on the location of the release on the site.
 - A box will be added to the left of the map, under the primary parcel box.
 - To remove the pin, click the x on the parcel box.
- If more than one parcel is affected by the release, additional parcel(s) may be added.
- The parcel may be already chosen for you or you may need to click on the parcel.
- If the release affects a different parcel than the primary parcel, you may select additional parcel as release parcels.
 - Each site can only have one primary parcel but may have multiple release parcels. You may add additional release parcels, as needed. To add additional parcels, click on the additional parcel on the map, and the parcel will be highlighted and a box with parcel information will appear on left side of the screen.
 - If the associated parcel selected is the release area, you can check the release box within the parcel information area. To remove a selected parcel, click the x on the upper right-hand corner of the parcel information box.

Note: Parcel boundaries are pre-established through GIS information provided by municipalities and are updated a few times a year. This is not controlled by DEEP.

The screenshot shows the 'Significant Environmental Hazard (SEH)' web application. On the left is a vertical navigation menu with steps: Acknowledge Release Reporting, Select Program Type, Select Program, Select Site, Add New Site, Add New Site: Additional Information, **Select Parcel(s)** (highlighted), Add Affiliations, Edit Case Name and Contacts, Enter Environmental Setting, Enter Environmental Concern, Enter Program Information, and Review Summary. The main content area is titled 'Significant Environmental Hazard (SEH)' and contains a 'Parcel(s)' section. Below this is a 'Primary Parcel' box with fields for Parcel ID (064_10659), Address (75 Elm St), Town Name (Hartford), and a checked 'Primary' checkbox. To the right is a map of Hartford, CT, with a search bar 'Search by Address or Coordinates' and a pin icon. A 'Site' box is overlaid on the map at '75 Elm St, Hartford, Connecticut, 06106'. At the bottom, there is a 'Pending Real Estate Transaction' section with radio buttons for 'Yes' and 'No' (selected), and 'Cancel', 'Save and Exit', 'Back', and 'Next' buttons.

Optional: You may note that there is a pending real estate transaction. After clicking Next you can add the expected date of the transaction or other key information if

you wish. You can edit this information on later screens if you don't wish to share this information publicly.

Setting Up Affiliates & Contact Information

Authenticated Users must provide information for the Regulated Entity and the submitter of the case.

- Start typing the name (company name or person's name) of the Regulated Entity. If the name appears, select it. If not, select Add New Account.
- Start typing the Regulated Entity's Address. If the correct address appears in the dropdown, select it.
- If not, select Add New Address and type the address into the pop up screen that appears and click **Verify Address**. A screen may pop up asking whether to use a version of the address stored in the system or the one that you typed (usually the difference is a 9 digit zip). Click the preferred address and select **Use Selected Address**.

Tip: All Affiliates will receive **automated email notifications** from REACT. It is important to keep the Affiliate and Contact information up to date to receive notifications.

Address

Please review and choose which address you'd like to use or go back to update the address.

Verified Address	Use As Entered
☒ 75 Elm St Hartford CT 06106-1648 US	☐ 75 Elm St hartford CT 10106 US

[Back](#) [Use Selected Address](#)

- Start typing the Regulated Entity's contact person's last name into Contact information
 - If the person's name is in the dropdown list, select the contact.
 - If there are no matches, select Add New Contact from the dropdown list.
- Add a billing contact or select **Same as Regulated Entity**. Then click **Next**.
- You only need to add one affiliate to progress to the next step. Due to the way notifications are set up, it is best to **only** add the most relevant affiliate(s) to the case.
 - If at any time you click **Next** and nothing happens, scroll up to find the mandatory field that was not completed.

Tip: At any point during the case creation process, the user may click the **SAVE** or the **CANCEL**

Managing user account information

Users can review the affiliates already associated with the case.

A button on the page – **Add Additional Regulated Entity** – is available for users to click to add new additional regulated entity.

The case may have up to three total additional regulated entities

Milestones

Milestones are regulatory or statutory requirements that have associated tasks or actions necessary for a case to progress.

The Milestones feature enables users to efficiently track, submit, and update milestone tasks. Each milestone identifies submittals that will be needed to address the milestone, along with their associated due dates (if required). Authorized Users can initiate a submittal and select relevant milestone tasks, including immediate or recurring actions, and populate the completion details.

The screenshot shows the 'My Milestones' page in the CT.GOV portal. The header includes the CT.GOV logo, the Department of Energy and Environmental Protection Portal name, a search bar, and user icons. The navigation menu has links for Home, Search, Sites, Cases, Submittals, Milestones (active), Chemicals, Reports, and Payments. The 'My Milestones' section shows a 'Recently Viewed' tab and a table of milestones. The table has columns for Milestones Number, Case Number, Site Name, Type, Milestones Status, and Items Completed. A single milestone is listed: MIL-038708, DCN-055804, CT DEEP Headquarters Office, Voluntary Parcel-Wide Cleanup, Scheduled, and 0 of 2 items. Below the table are pagination controls showing 'Showing Page 1 of 1 Pages' and buttons for First, Prev, 1, Next, and Last.

Milestones Number	Case Number	Site Name	Type	Milestones Status	Items Completed
MIL-038708	DCN-055804	CT DEEP Headquarters Office	Voluntary Parcel-Wide Cleanup	Scheduled	0 of 2 items

Immediate Actions

- From the case screen associated with the relevant release, click on **New Immediate Action** near the top of the screen. Read the notice on the following page and, if appropriate, click **Begin**.
- Indicate the condition type and upload the lab results. Click **Next**.
- Under Details, answer the question(s) posed about the release.
- Under Chemical Details, to add a chemical, click on **New Chemical** on the right side of the screen.
- Begin typing the name of the chemical or released substance (e.g. gas, diesel, etc.). A dropdown list appears at three letters, but you may want to type more letters to get closer to the released chemical, especially if the chemical name begins with a common prefix. Do **not** use acronyms.
- Indicate the last recorded concentration and choose the units from the dropdown list. Answer the quantity released and units, if possible, and click **Submit**. Add additional chemicals, as needed, then click **Submit**.

Note: After creating a new immediate action, a pink banner stating “Attention: This Release Requires Immediate Action. Take Steps to Achieve Progress Milestones.” will appear until the immediate actions are resolved in REACT.

Tracking Milestones Due

- To submit Immediate Action Plans and Immediate Action Reports, from the case screen associated with the relevant release, select **New Submittal**.
- On the Submittal screen, select “Investigation” from the Submittal Category and either Immediate Action Plan or Immediate Action Report. Indicate whether the document requires DEEP Review and Approval and click **Next**.
- Indicate the appropriate milestone under Related Immediate Actions. If the document relates to all milestones listed, clicking the box next to Milestone Number will check all of them. Click **Next**.
- Select **Upload Files** then select the file from your computer. Select the date of the document. If this is a revision of an earlier submittal, check the box to indicate that. Begin typing the author’s name and select them from the dropdown or select Add New Contact and complete that information as described in the [Affiliates](#) section. Click **Submit**.
- The following screen will show the status of the Immediate Action Plan or Immediate Action Report as Received. If needed, with the buttons at the top right, you may **Add File** to upload an additional file or **New Submittal Note** to communicate with staff.

Tip: The portal will create notifications that appear on the bell at the upper right hand corner of the screen. They are useful reminders of due dates and confirmation that files were uploaded successfully.

Tip: Nothing gets launched from the milestone page, it is simply informational. Nothing prevents early submittal of documents using the **New Submittal** button.

In addition to the Milestone Submittals tab, there are panes beneath the Site Map. They show basic information about Files (that have been uploaded), Related Submittals, Milestones, Tier Milestones, Case Parcels, Case Affiliations, Case Chemicals, and Fees.

- To begin a Tier Checklist select **New Submittal** from the buttons at the top. In the dropdown under Submittal Category, select Tiers then select Tiers Checklist from the Submittal Type dropdown and click **Next**.
- The General Case Information will appear at the top of each Tiering screen. Read the text in Tier Acknowledgement and check the mandatory checkboxes.
- Under Tier Information, the Tiering Action Selection will automatically populate. If it's the First Tier Assignment, you will have the option of grouping releases and may select yes or no from the dropdown and click **Next**.

Note: The option to group releases is **only** available the first time the Tier Checklist is is done.
- Answer the questions using the dropdown lists. If you indicate a drinking water receptor survey was completed, an upload file panel will open for the receptor survey document. Select **Upload Files** then select the file from your computer. Type the file name using the following this naming convention: **SiteAddress_Town_DocumentType_DateofDocument**. Select the date of the receptor survey.
- Indicate whether a Vapor Intrusion Receptor Survey has been completed. If you answer yes, it will ask if that survey was included with the Drinking Water Receptor Survey or Tier Characterization Report. If that answer is no, an upload file panel for the Vapor Intrusion Receptor Survey will open. Select **Upload Files** then select the file from your computer.
- Continue to answer the questions using the dropdown lists.
- REACT will assign a Tier based on the information you entered.

Tier 1A Indicators

I. Receptors Are Known And Documented

*1a. A scoping level ecological risk assessment has been completed

Yes

*1b. A drinking water receptor survey has been completed

Yes

For the purposes of this question, a drinking water receptor survey shall have been completed if it is determined that a release has not impacted groundwater. Please attach your water receptor survey.

- The “Select Tier Delineation Types” section asks questions about the level of contamination present, whether certain exemptions are being used, or if levels are at or below background.

*** Select Tier Delineation Type(s)**

☐ Concentration above 50% of the applicable cleanup standard
☐ Concentration above 50% of the applicable laboratory reporting limit
☐ Delineation to the extent needed to determine is prudent to remediate using the conditional exemption for historically impacted material (parcel must be industrial/commercial activity)
☐ Demonstration that each substance is present in soil or groundwater at a level less than or equal to the background concentration
☐ Pesticides discovered are present due to the application of pesticides
☐ Use of pesticides for the pesticide's intended purpose

*** Tier Characterization completion date**

- Enter the date of the Tier Characterization document.
- Indicate whether LEP-approved remedies have been implemented and that all documentation is in the report.
- Indicate whether the LEP verification is attached to the report.
- The next screen is the Tier Checklist Affiliations screen. Check that all affiliate information is current.
- If a Billing Contact had not been entered previously, enter that information now or select **Same as Regulated Entity**.

How to Submit Reports and Other Documents

Click on blue and white **New Submittal** toward the upper left of the screen.

The screenshot shows the CT.GOV Department of Energy and Environmental Protection Portal. The case details for 43 Mattabasset Dr, Meriden, CT 06450 (Release-Based) are displayed. The case number is RCN-171582. The progress bar shows the following steps: Investigation Started (active), Investigation Completed, Cleanup Started, Soil Cleanup Complete - GW..., Cleanup Complete - LTS, and Cleanup Complete - No LTS. The table of milestone submittals shows one overdue submittal for the Release Remediation Closure Report, due on 1/20/2023.

Submittal Type	Related Milestones	Submittal Status	Due Date
Release Remediation Closure Report	MIL-094587	Overdue	1/20/2023

If you have not yet worked on the case in REACT that had existed as a case in a legacy database prior to REACT's launch, then you may need to add the Regulated Entity if it is not already populated. Then you can add yourself as an Affiliate to the case. Look for the Add/Edit Affiliate button(s).

Tip: Use the lists in the [Appendix A](#) to locate the submitted category and submittal type.

The screenshot shows the 'Submittal' form in the CT DEEP Protection Portal. The header includes the CT.GOV logo, the Department of Energy and Environmental Protection Portal name, and a search bar. The navigation menu lists Home, Search, Sites, Cases, Submittals, Milestones, Chemicals, Reports, and Payments. The left sidebar shows a progress bar with three steps: 'Select Submittal' (active), 'Associate Cases', and 'Enter Submittal Information'. The main content area displays 'Case Number: RCN-171582' and a 'Submittal' section. Below this, it says 'Complete the information below.' and shows two dropdown menus: '* Submittal Category' and '* Submittal Type'. At the bottom of the form are 'Cancel' and 'Next' buttons.

For Releases from Regulated USTs

- If submitting a LUST form or report:
 - Select **New LUST Form** (white button with blue type to the upper center of the screen).
 - Select a Form Type from the dropdown list then follow the prompts on the form. The form is pre-loaded with the existing information in REACT for the LUST case, please edit that information as needed. All required fields have a red asterisk in front of them. Further instruction on LUST Forms can be found on the CT DEEP Webpage: [Underground Storage Tank Clean-Up](#).
- If submitting an Environmental Use Restriction or Alternative/Additional Pollution Substance Criteria request for a regulated UST:
 - Select **New Submittal** (white button with blue type to the upper right of the screen).
 - Select a Submittal Category from the dropdown list, then select the Submittal Type from the dropdown list.
 - Indicate whether the document submitted requires DEEP Review and Approval or not and click **Next** at the bottom right.
 - A Submittal Related Cases screen appears. Click the box to the left of each case to which the document pertains, then click **Next**. If no cases are listed, click **Next**.
 - Click on **Upload Files** and select the document from your computer. Click **Done** when the file has uploaded

For Most Other Cases

- Select **New Submittal** (white button with blue type to the upper left of the screen).
- Select a Submittal Category from the dropdown list, then select the Submittal Type from the dropdown list.
- Indicate whether the document submitted requires DEEP Review and Approval or not and click **Next** at the bottom right.
- A Submittal Related Cases screen appears. Click the box to the left of each case to which the document pertains, then click **Next**. If no cases are listed, click **Next**.
- Click on **Upload Files** and select the document from your computer. Click **Done** when the file has uploaded.
- Type the file name using the following this naming convention:
SiteAddress_Town_DocumentType_DateofDocument
- Add the document date and Author. If the document is a revision of a previous submittal, click the box in the lower left. Click **Submit** on the lower right.
- The following screen will show a summary of the submittal information you just entered (not editable), you will get a notification on the bell at the upper right of the screen and you will get an email with the submittal information.
- Documents are available immediately. You may need to refresh your browser for it to be visible.
