Hi Rebecca,

This email is regarding a webinar our organization attended January 16th, 2024, on Integrated Water Planning Management Phase 2.

State Healthcare would like to develop public and private residential care facilities or congregate housing communities with FDA approved spring water for hygiene and consumption purposes in comparison to a reservoir.

Most springs are naturally carbonated and no two springs taste exactly alike, each spring has its own distinct mineral makeup and resulting flavor profile. Purported health benefits include clearing skin, helping digestion, even strengthening blood, vary from spring to spring. The FDA defines spring water as derived from an underground formation from which water flows naturally to the surface, this water must be collected only at the spring or through a borehole that taps the underground formation feeding the spring. If some external force is used to collect the water through a borehole, the water must have the same composition and quality as the water that naturally flows to the surface (www.findaspring.org).

These are a few companies that will be able to assist with this project:

Contact: Dennis Kanakis, CMI
Client Services, Olympian Water Testing
NY 212-461-3879 |
NJ (908) 772-8601 | M 917-673-6859

State Healthcare aims to provide the best healthcare, with digital information and communication technologies, to access healthcare services, while managing to improve one's well-being.

This is an ideology to shape the way we view public and environmental health, such as housing that is conducive to an area, environment or medical condition, our agricultural system, air quality (chemical, non-chemical, bacterial, viral), and forestry.

The proposed project may decrease health issues, create an easier management system for residents, plus many other incentives, as we develop or convert state parkland; build residential care facilities, (one-story brick, log cabin, steel master or stucco home community) with FDA approved spring water.

We have many projects to pursue, utilizing a different approach as it pertains to healthcare. Please contact us by email or phone if you have any questions or would like more information.

Thank you,
Shauna Williamson
