

HIV Positive Residents' Care Rates by G2Z Target Populations, Connecticut, 2016-2020

HIV Positive Residents' Suppression Rates by G2Z Target Populations, Connecticut, 2016-2020

Note: Includes specified persons aged ≥ 13 living with HIV in Connecticut in the specified year. Persons who have at least one CD4, viral load or HIV-1 genotype test during the specific time year are considered as linked to care during that time. Specified persons aged ≥ 13 whose most recent viral load test result is < 200 copies/ml in the specified year are considered virally suppressed. Data for 2020 should be interpreted with caution due to the impact of the COVID-19 pandemic on access to HIV testing & care-related services. Source: HIV surveillance registry for cases reported through December 2021.
