Total	42.2	48.8	48.2	36.6	20.5

1. Rate per 100,000 population based on the 2010 census.

2. Note that reported numbers less than 12 (and accompanying rates and trends) based on these numbers, should be interpreted with caution because the numbers have underlying relative standard errors greater than 30% and are considered unreliable.

3. Chronic hepatitis C = a case that is laboratory confirmed and that does not meet the case definition for acute hepatitis C.

4. Laboratory confirmed= detectable RNA.
