^aEstimates were derived by using back-calculation. Estimates were rounded to the nearest 100 for numbers >1,000 and to the nearest 10 for numbers <1,000 to reflect the uncertainty inherent in statistical estimates.

^bInclude persons whose most recent known address or residence at death is in your state by 12/31/2014.

^cPersons living with diagnosed or undiagnosed HIV infection.

^dSome subgroups might be grouped together to meet the sample size criteria.
