

# Tap water.

## Water

Joy

Happy

Peace

Love

The water is very Healthy if you don't drink some you can go the hospital because your blood cells don't get enough. Another reason is that if you are running and you have asthma you can have water to controll your self. An important thing is that if you buy fountain <sup>bottled</sup> water you are wasting money and when you drink tap water you have water for a lot more days but you still pay. Last we are going to talk about how many people drink tap water and Bottled water in my class. The results were that 16 people prefer Tap water and 3 people prefer Bottled.

Tap	Bottled

### Bottled

### Tap
