

Connecticut Environmental
Health Association

SAVE THE DATE!

Thank you for your interest in the Connecticut Environmental Health Association's (CEHA) and CT Department of Public Health (DPH) Drinking Water Section's (DWS) joint efforts to establish a sodium chloride stakeholder workgroup.

Currently, the mission statement of the workgroup has been defined as:

“The Sodium Chloride Stakeholder Workgroup recognized the prevalence of sodium chloride, or road salt, in groundwater supplies and – working together with stakeholders – will propose ideas to help identify and address the increasing presence of the contaminant in drinking water statewide.”

Your addition to this workgroup would be greatly appreciated to help identify areas of concern in regards to sodium chloride and other forms of deicing chemicals, including coordination and alignment of ideas across several agencies and associations. This workgroup will find strength in a wide array of perspectives, and your perspectives will lend a critical hand in refining the workgroup's purpose.

You are hereby invited to our first meeting on June 11, 2019 at the DPH Laboratory in Rocky Hill, CT. If you have any additional questions regarding this upcoming event, please feel free to reach out to Vicky Carrier, Pat Bisacky or Mathew Wallach of the CT DPH Drinking Water Section at 860-509-7333.

What:

Sodium Chloride Stakeholder Workgroup Meeting

When:

**June 11, 2019
9:00am – 3:00pm**
