DWS Circular Letter #2021-67

TO: Community Public Water Systems
FROM: Lori Mathieu, Public Health Branch Chief, EHDW 
DATE: September 12, 2021
SUBJECT: EPA's Introduction to Cybersecurity Virtual Workshop (Free of Cost)

The Department of Public Health (DPH) Drinking Water Section (DWS) would like to inform the public water system (PWS) that the EPA is sponsoring a series of free virtual workshops on water sector cybersecurity. These workshops consist of two half-days. The first day will give participants current information on cyber threats and risk drivers, resources to bolster cybersecurity, and key findings from cyber vulnerability assessments of water and wastewater systems. The second day will lead participants through incident response exercises for cyber-attacks on water and wastewater systems.

Workshop Dates, Times, and Registration Links:

EPA is offering three different opportunities to participate in this workshop - the same content is repeated, so only register for one session. Workshop participation is open to drinking water systems, government officials, and others involved in water sector cybersecurity. Continuing education credits have been applied for in all 50 states. Participants must attend both days in full to receive the credits. Workshop dates and registration links are listed below.
