Public Comment	None	None
DPH/OEMS Report	Distributed – no discussion	None
Chairs Report	LOB is open and functioning primarily via video conference for meetings, I sent an email to the communications committee to establish a meeting regarding the communications stuff. OEMS has submitted some potential legislation for consideration. Greg spoke at the Fire & EMS Caucus regarding CEMSAB initiatives. I am developing a working list of bills that well distribute and follow as a committee	N/A
PTSI	Let’s get some data on what the last 2 years have shown. A lot of the training we already have in place, already meets the standards – currently the only difference is that the MHFA course uses the “MHFA” name. We have to provide answers	Get some data
Mental Health First Aid	Discussion on the fact that MHFA still has speaking on using the one “current vendor” – needs to still be opened up to use other types of training program. A lot more questions than answers from the current re-write	Kevin will also help put some language together
Trauma Committee	Trauma Committee will be putting in legislation to make them a statutory entity. New representation	Mike will reach out to Trauma

New Business	EMD/CMED – Look into getting EMD tied into medical direction/CEMSMAC. Potentially talk to dispatchers. Don't want to add cost or burden on OEMS. Looking to just tie CEMSMAC into medical oversight. Is there a mechanism.	Mike - Reached out to Betty Morris on Comm committee
EMR/Paramedic crew	Kate sent draft language – will send language to group – Brought up at CEMSAB – CEMSAB looking for data to justify need. We just need to be careful, how we apply this so that were not creating abuse. Concepts include: Should be service driven / not a whole sale state option and used through LEMSPE with a specific plan Greg – Maybe a Break Out discussion	Looking at getting more data
Federal Level	Nothing new – NAEMT site	Continue to Monitor
FYI's	N/A	N/A
