

Regional Mass Casualty Incident Trailers

Through collaboration between the Office of Public Health and Preparedness Response (OPHPR) and the Office of Emergency Medical Services (OEMS), the five regional Mass Casualty Incident (MCI) trailers have been updated focusing primarily on utilizing them as pre-deployment assets. Emergency deployment for long duration incidents that are evolving may be feasible, but the time required to mobilize should be considered.

Trailers are prepositioned with host agencies in each of the five (5) regions. Currently the host agencies are Danbury Fire Department, American Ambulance, New Britain Emergency Medical Services, Stratford Emergency Medical Services, and New London Fire Department.

Each trailer contains a cache of disposable and durable basic life support medical equipment to support a large-scale incident or pre-planned event. Trailers have similar layouts and content (maps specific to each trailer are posted in each of the trailers).

When requesting a trailer please have the following information available:

Pre-deployment – more than one unit may be requested due to logistics; size of event, difficulty in moving through the area etc.

Information needed at time of request:

- Requesting agency and authority (Chief of Fire/EMS/EM/PD)
- Event location and designated staging area
- Event type
- Estimated number in attendance
- Duration of event

Emergency Deployment - Based on the totality of the circumstances and in accordance with established regional protocols more than one unit may be requested.

Information needed at time of request:

- Requesting agency and authority (Chief of Fire/EMS/EM/PD)
- Incident location and designated staging area
- Incident type
- Estimated number of casualties
- Special hazards or safety concerns
