

WESTERN CONNECTICUT HEALTH NETWORK

DANBURY HOSPITAL

Palliative Care Program

Damanjeet Chaubey 2014

Palliative Care Constitutes a Change in Focus from Usual Care

Usual Care

Palliative Care

Goals of Care:

Delayed until end of life is near

Established early in disease trajectory

Treatment Strategy:

Includes primarily curative treatments

Includes a combination of curative and symptom-focused treatments

Service Utilization:

Pursues curative treatments even when low-yield, high-cost, and burdensome for patient

Pursues treatments that align with patient goals

Mission

- To provide collaborative care to hospitalized patients with chronic, life-limiting illnesses, with a focus on pain and symptom management, enhancement of function, physical comfort, quality of life, psychosocial support, spiritual support, and communications about goals of care for the patient as well as for their family. In addition, the team will support, guide and educate the hospital staff and act as a liaison across the continuum of care.

Vision

Our vision is to be a regional and national leader in palliative care for the benefit of all patients, families, caregivers, and policy makers, while maintaining alignment with the goals of the organization

- Provide patients with the right care in the right place at the right time
- Bring together the best people and best processes across the continuum
- Engage and empower patients and families as partners in their care
- Create an environment of continuous learning, discovery, and innovation

Values

- Excellence
- Integrity
- Teamwork
- Respect
- Fiscal Responsibility

Patients Appropriate for Inpatient Palliative Care Consults

- Patients with newly diagnosed life-threatening illness
- Patients requiring complex inpatient symptom management.
- Patients discharged home with hospice or another institution for end-of life care
- End of life care in the hospital

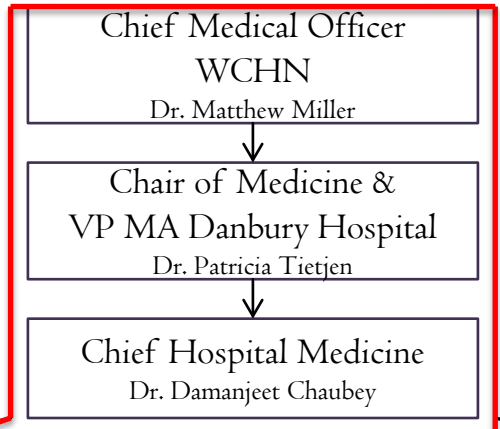

Illness Trajectory

Unlike cancer diagnoses organ failure due to chronic disease and dementia have much more unpredictable prognosis

Program Structure based on National Quality Forum Consensus

- Program Structure and Administration – Generalist/Specialist Model within the Hospital Medicine department
- Types of Service - Consult service available to all hospital patients 24/7

Medical Director –
Dr. Aparna Oltikar

Physician Advisors:
AO, GA, JP, DC, CA

Karen Mulvihill – Director
Julia MacMillan – Coordinator
Bernadene Lawrence-Philip – Coordinator

Physicians:
Jeanine Famiglietti, JoAnn Maroto-Soltis & Heather Sung

- Inpatient consult service
- Outpatient consult service
 - Praxair Cancer center
 - SNF
 - Home visits

- Primary medical attending for all inpatient medical cases except one PCP
- Medical consult service including Pre-Op evaluations
- Teaching service: inpatient core faculty for Internal Medicine and Primary Care Residency Program
- Organizational initiatives – project leaders, task forces, committees
- General palliative care

- Chest Pain
- Syncope
- TIA
- Atrial Fibrillation
- Gastroenteritis
- Allergic Reactions

Director –
Kathy Ferrara-Tesla

Medical Director –
Dr. Aparna Oltikar

Associate Program Director –
Dr. J. Periyapperuma

Core Faculty Physicians:
SS, AO, DC, LS, GA, JP

Generalists Treat Basic Needs, Specialists for Complex Cases

Hybrid Model for Palliative Care

Patients with
Basic Palliative
Care Needs

Patients with
Complex Palliative
Care Needs

Seen by generalists

Seen by specialists

Basic Needs

Complex Needs

Generalist Skill Set

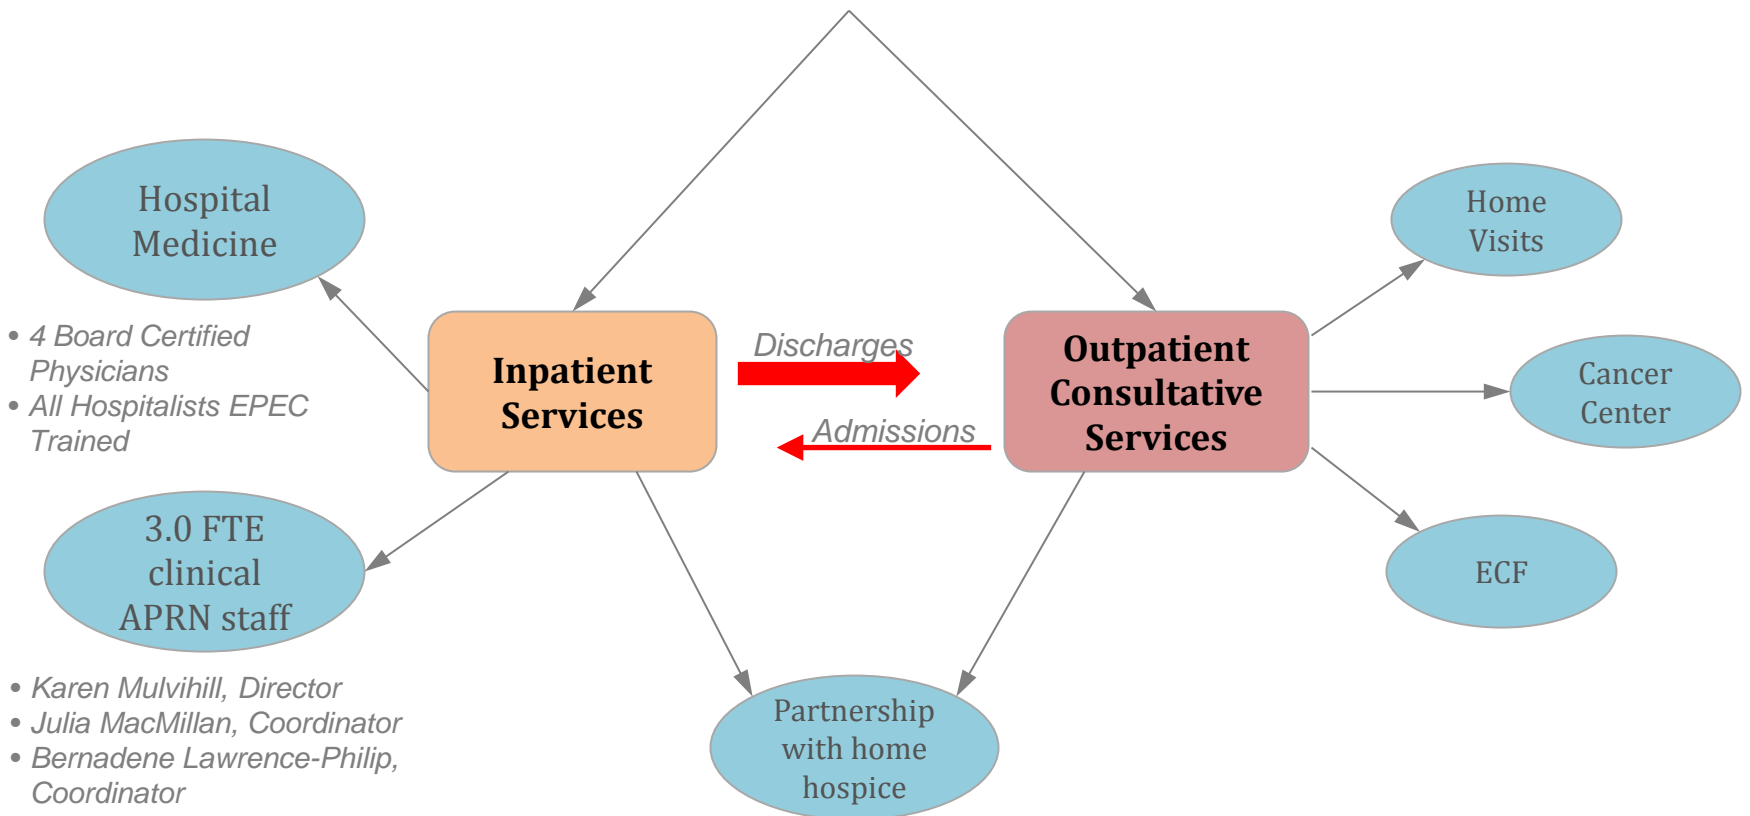

- Basic management of pain, symptoms
- Basic management of depression, anxiety
- Basic discussions about prognosis, goals of treatment, suffering, code status

Specialist Skill Set

- Management of refractory pain or other symptoms
- Management of more complex depression, anxiety, grief, and existential distress
- Assistance with conflict resolution regarding goals or methods of treatment – within families, between staff and families, treatment teams
- Assistance in addressing cases of near futility

Palliative Care Program at Danbury Hospital

Damanjeet Chaubey, MD - Medical Director

Palliative Care Committee

- Damanjeet Chaubey- Medical Director & Chief of Hospital Medicine
- Karen Mulvihill – Director of Palliative Care Services
- Julia MacMillan and Bernadene Lawrence-Phillip – APRNs
- Heather Sung, Jeannine Famiglietti, and JoAnn Maroto-Soltis – Palliative Care Physicians and Hospitalist
- Marie Babia and Deanna Ballard – Inpatient Oncology
- Jamie Chadwick – Pharmacy
- Lynn Crager- Spiritual Care
- Nicole Knapp – Social Work
- Alice Jakubek – Clinical Resource Management
- Peggy O’Shea – Complimentary Nursing
- Keri Supper – Speech Therapy
- Vicki Barber – Dietary
- Karen Barrett – Performance Improvement

Core Palliative Care Team

- Damanjeet Chaubey- Medical Director & Chief, Hospital Medicine
- Karen Mulvihill – Director of Palliative Care Services
- Julia MacMillan and Bernadene Lawrence-Phillip – APRNs
- Heather Sung, Jeannine Famiglietti, and JoAnn Maroto-Soltis – Palliative Care Physicians and Hospitalist
- Lynn Crager- Spiritual Care
- Nicole Knapp – Social Work

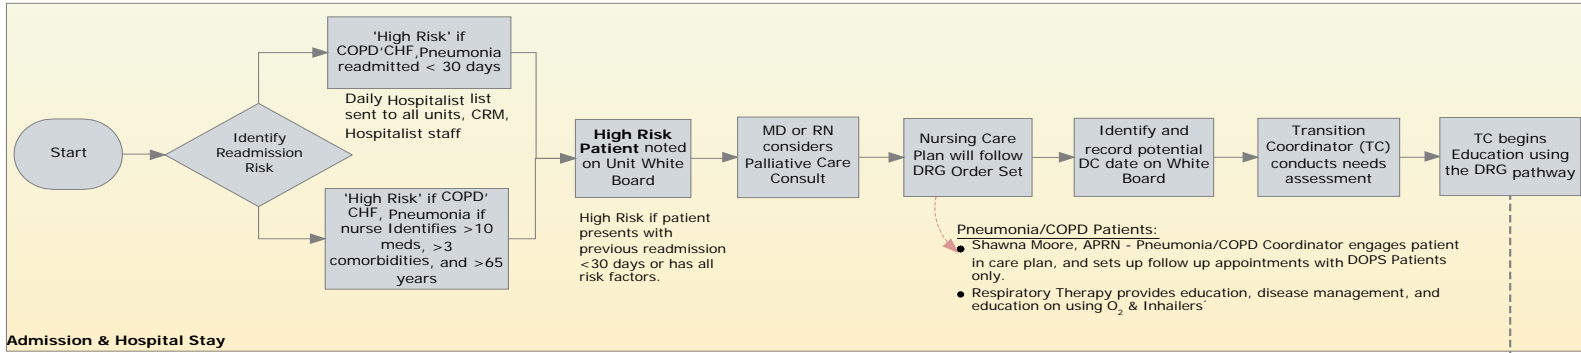

Clinical Practice Guidelines

- National Consensus Project for Quality Palliative Care Clinical Practice Guidelines for Quality Palliative Care 3rd edition 2013
- AHA/ASA Scientific Statement: Palliative and End-of-Life Care in Stroke: A Statement for Healthcare Professionals From the American Heart Association/American Stroke Association.
- AHA Scientific Statement: Decision Making in Advanced Heart Failure: A Scientific Statement From the American Heart Association Circulation
- An official American Thoracic Society workshop report: assessment and palliative management of dyspnea crisis.
- Shared Decision-Making in the Appropriate Initiation of and Withdrawal from Dialysis

Process for Palliative Care per NQF guidelines

- Identification of a high risk patient
- Palliative care Screening tool
- Palliative Consult Referral Sources
- Transitions of Care
- Continuity of Care

Quality Discharge Process Flow - Reducing Readmissions for COPD, CHF, Pneumonia

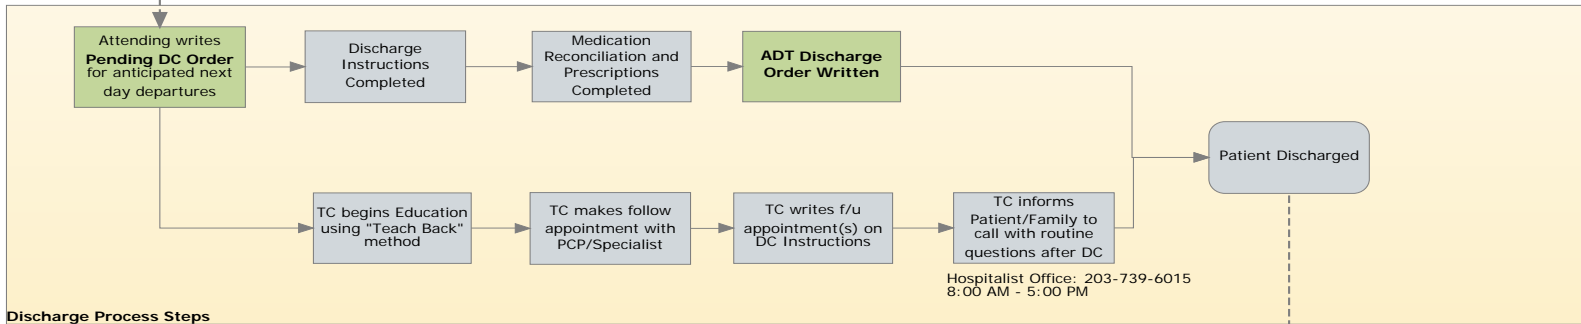

Admission & Hospital Stay

Transition Coordinators:
Sarah Schoeneberger, ext. 7041
Sheila Osborne, ext. 8145

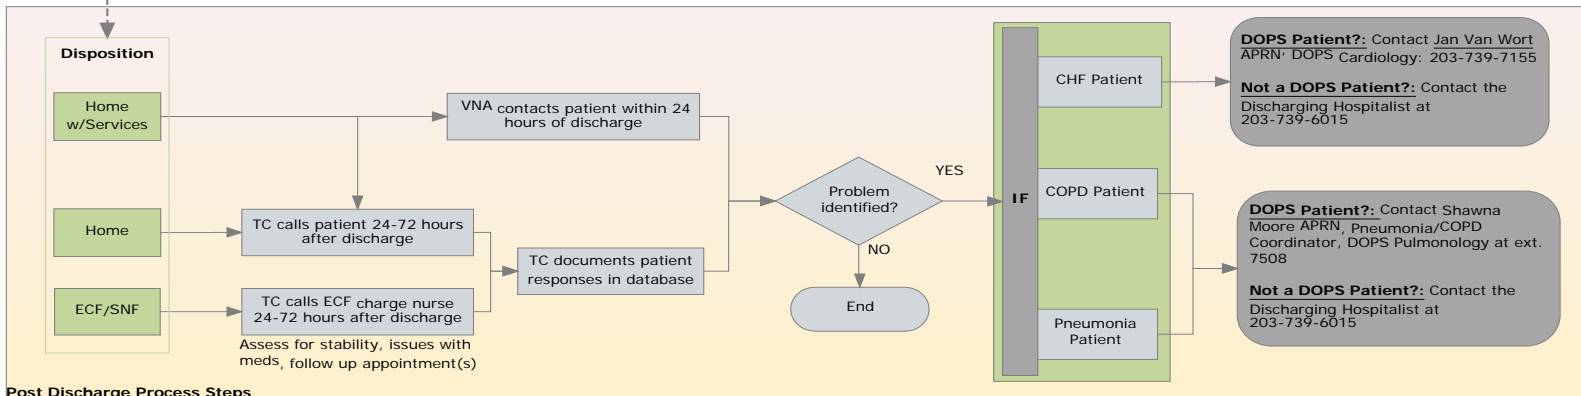

Hospitalist Coordinator:
Sue Mangelsdorf, ext. 6015

DOPS Cardiology APRN:
Jan Van Wort, 203-739-7155

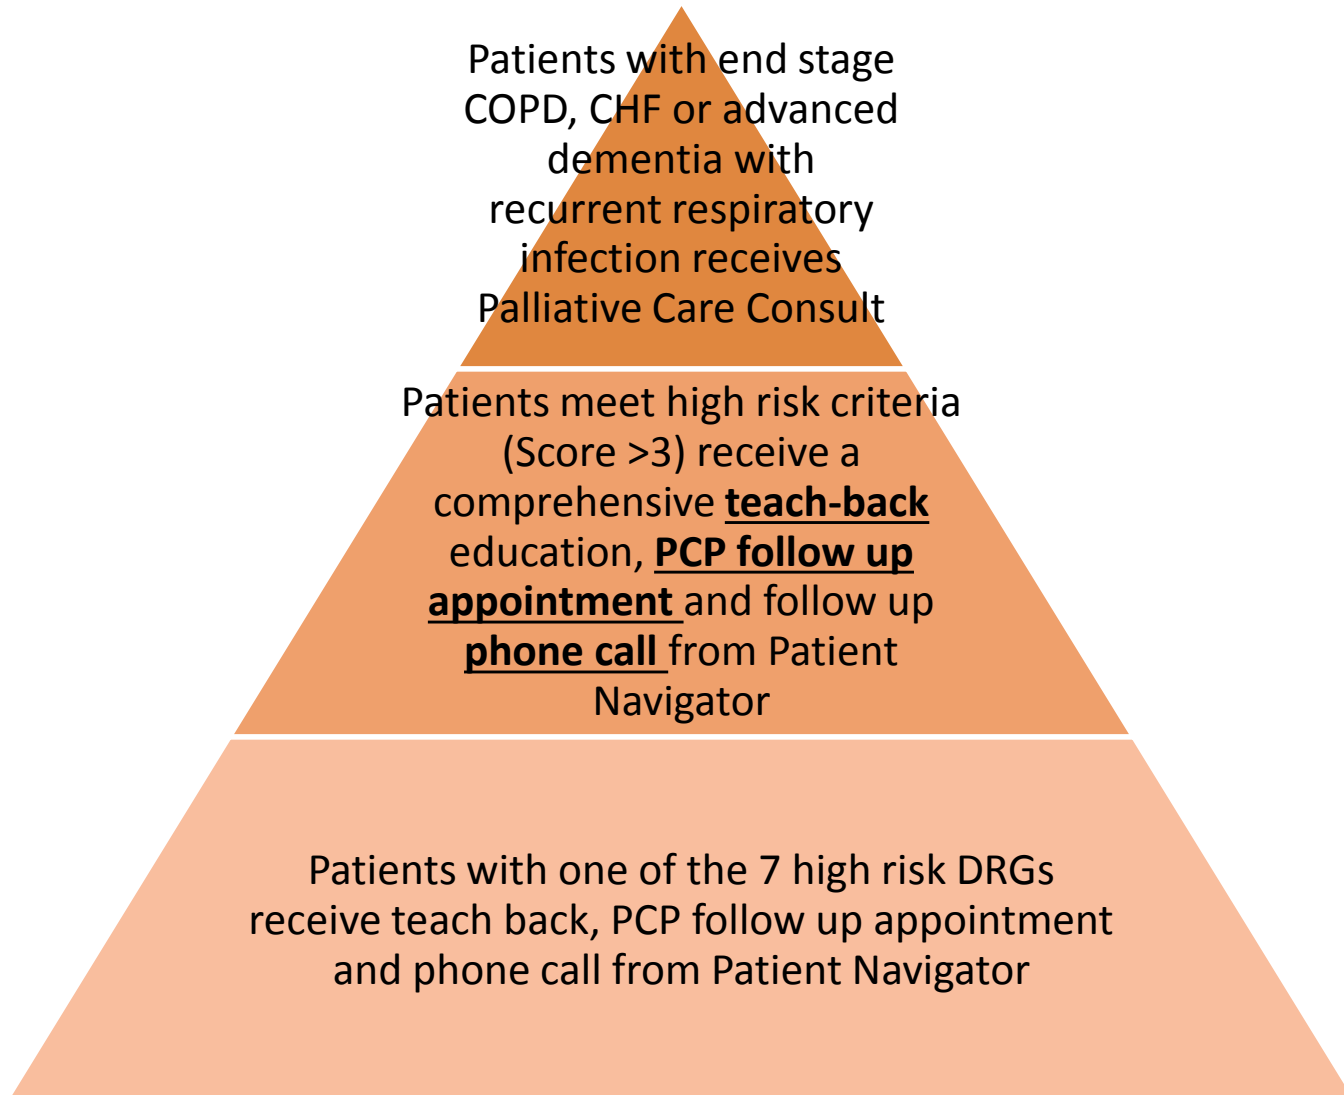

DOPS Pulmonology APRN:
Shawna Moore, ext. 7508

Discharge Process Steps

Post Discharge Process Steps

Patients with end stage
COPD, CHF or advanced
dementia with
recurrent respiratory
infection receives
Palliative Care Consult

Patients meet high risk criteria
(Score >3) receive a
comprehensive **teach-back**
education, **PCP follow up**
appointment and follow up
phone call from Patient
Navigator

Patients with one of the 7 high risk DRGs
receive teach back, PCP follow up appointment
and phone call from Patient Navigator

Palliative Care Screening Tool:

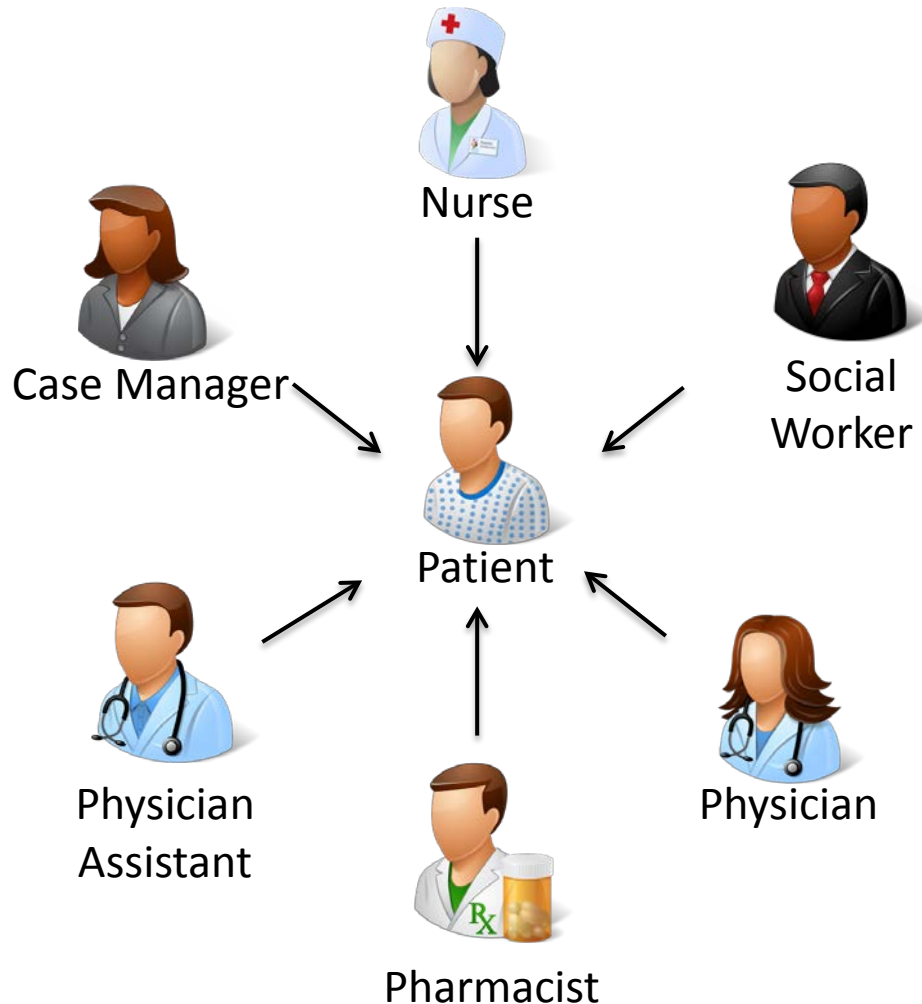

- If palliative care screen score is > 8, Nurse Navigator will place consult with palliative care team directly
- If score is between 4 – 7, navigator should call palliative care office

PALLIATIVE CARE SCREENING TOOL (Not a permanent part of the medical record)			
Criteria – Please consider the following criteria when determining the palliative care score of this patient			
1. Basic Disease Process			SCORING
a. Cancer (Metastatic/Recurrent)	d. End stage renal disease		Score 2 points EACH _____
b. Advanced COPD	e. Advanced cardiac disease – i.e. CHF, severe CAD, CM (LVEF <25%)		
c. Stroke (with decreased function by at least 50%)	f. Other life-limiting illness		
2. Concomitant Disease Processes			Score 1 point overall _____
a. Liver disease	d. Moderate congestive heart failure		
b. Moderate renal disease	e. Other condition complicating cure		
c. Moderate COPD			
3. Functional status of patient			Score as specified below _____
Using ECOG Performance Status (Eastern Cooperative Oncology Group)			
ECOG	Grade	Scale	
	0	Fully Active, able to carry on all pre-disease activities without restriction.	Score 0
	1	Restricted in physically strenuous activity but ambulatory and able to carry out work of a light or sedentary nature, e.g., light housework, office work.	Score 0
	2	Ambulatory and capable of all self-care but unable to carry out any work activities. Up and about more than 50% of waking hours.	Score 1
	3	Capable of only limited self-care; confined to bed or chair more than 50% of waking hours.	Score 2
	4	Completely disabled. Cannot carry on any self-care. Totally confined to bed or chair.	Score 3
4. Other criteria to consider in screening			Score 1 point EACH
The patient:			
a.	is not a candidate for curative therapy		_____
b.	has a life-limiting illness and chosen not to have life prolonging therapy		_____
c.	has unacceptable level of pain >24 hours		_____
d.	has uncontrolled symptoms (i.e. nausea, vomiting)		_____
e.	has uncontrolled psychosocial or spiritual issues		_____
f.	has frequent visits to the Emergency Department (>1 x mo for same diagnosis)		_____
g.	has more than one hospital admission for the same diagnosis in last 30 days		_____
h.	has prolonged length of stay without evidence of progress		_____
i.	has prolonged stay in ICU or transferred from ICU to ICU without evidence of progress		_____
j.	Is in an ICU setting with documented poor or futile prognosis		_____
TOTAL SCORE			_____
SCORING GUIDELINES:			
TOTAL SCORE = 2 No intervention needed			
TOTAL SCORE = 3 Observation only			
TOTAL SCORE = 4 Consider Palliative Care Consult (requires physician order)			
TOTAL SCORE =>8 Order Palliative Care Consult			

SIGNATURE STAFF MEMBER COMPLETING FORM _____

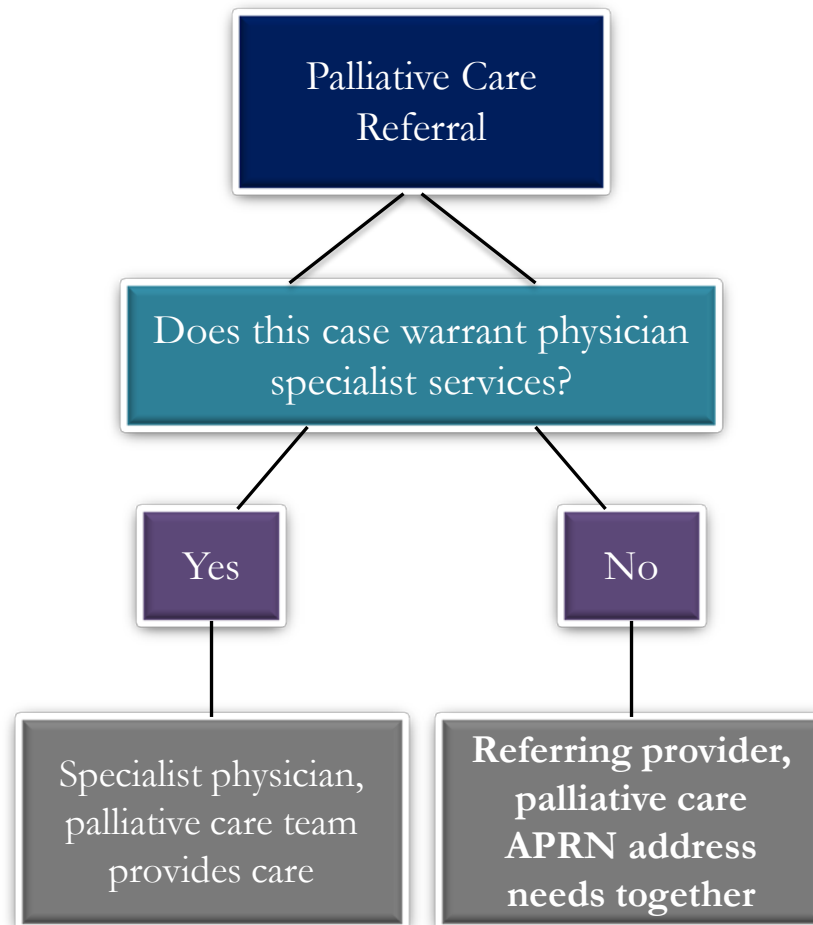

DATE _____

Members of a Patient's Care Team Who May Identify Palliative Care Needs

Referring Provider an Integral Player

Palliative Care Service Delivery Pathway

Nurse-led Referral

- Consult initiated with a palliative care screening tool completed by an RN navigator
- If screening identifies potential palliative care need, RN reviews results with a member of the palliative care team
- Palliative care team flags patient for potential referral through a note in the record or by contacting the physician

Case Manager-led Referral

- Consult initiated by a Case manager based on the risk score and patient needs
- Case manager makes the palliative care referral order after discussion with a physician
- Physician can give verbal assent for referral
- Case manager ensures the palliative care team sees the patient

Advanced Treatment Plan

Advanced Treatment Plan (ATP)

- Discussion held with patient
- Discussion held with: legal next of kin
- Designated Health Care Representation
- Designated Conservator

If the patient has a developmental disability please consult with Clinical Resource Management before making a DNR

- DNR with FULL MEDICAL TREATMENT

Instructions for Intubation and Mechanical Ventilation

- Trial Period of Intubation and mechanical Ventilation
- Noninvasive Ventilation (BiPAP) if appropriate

Artificial Nutrition and Hydration

- No Feeding Tube
- A trial of Tube Feeding via Nasogastric Tube (NGT)
- Long-term feeding tube if needed
- NO Intravenous Fluids (IVF)
- A trial period of IVF as directed by Physician

Other treatments to be withheld:

- Dialysis
- Vasopressors
- Transfusions
- Pacemaker
- Other (please specify): _____

Comfort Measures Only

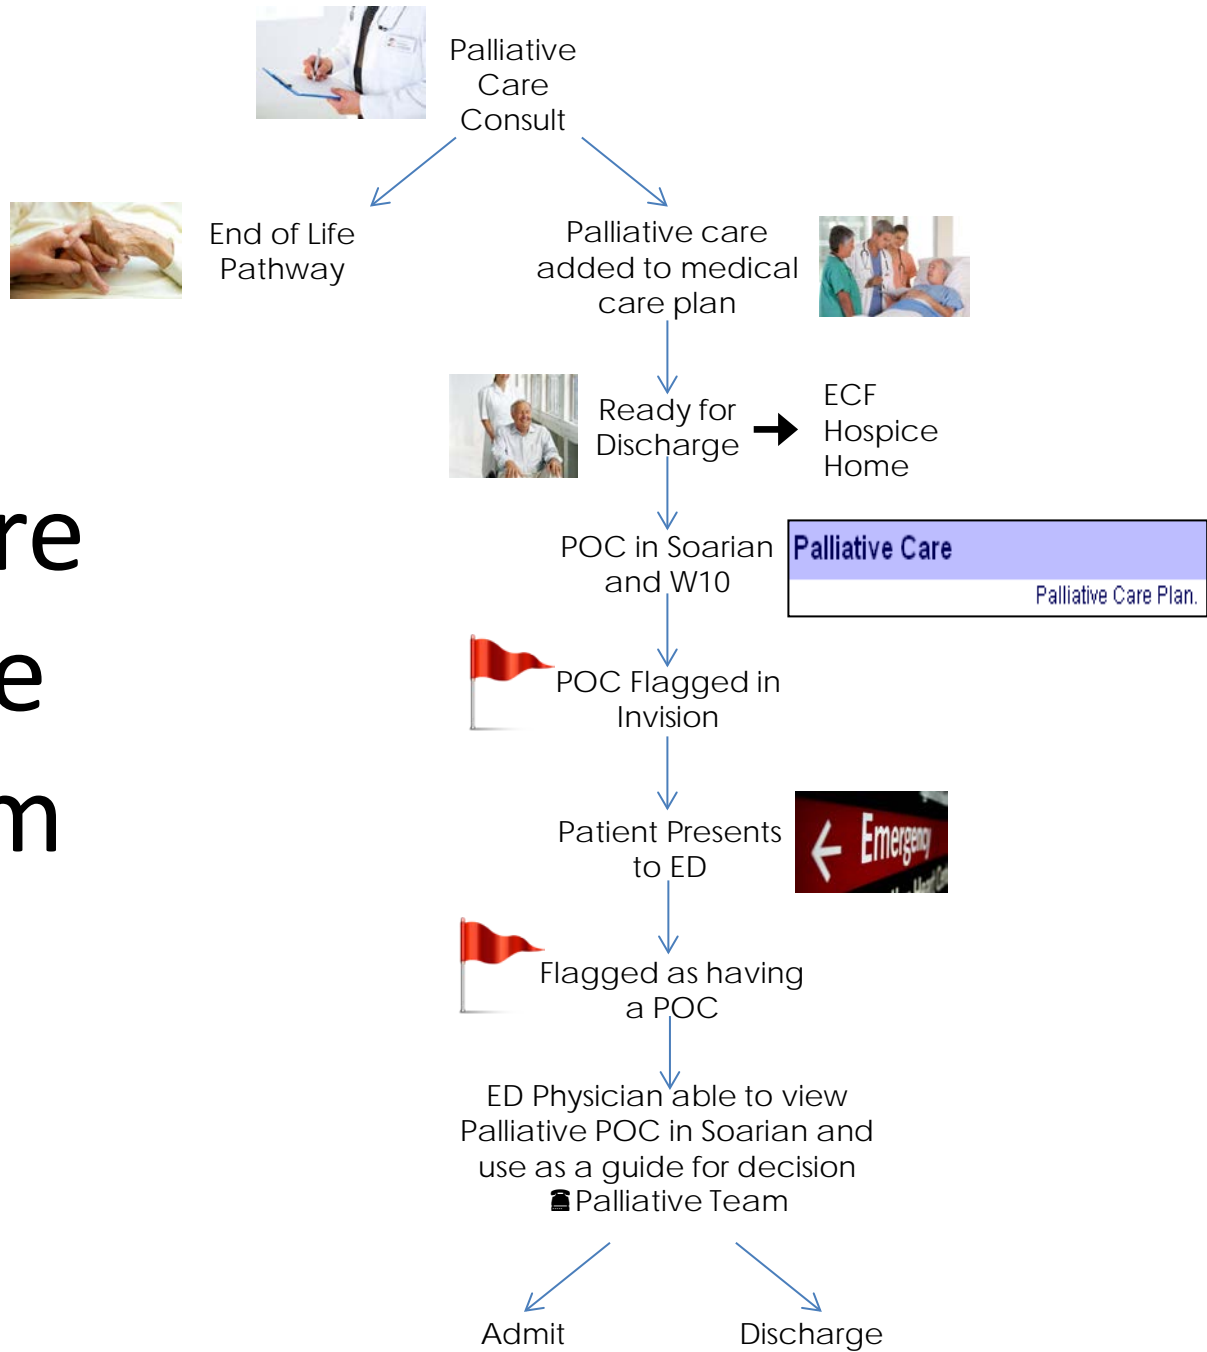

Comfort Measures are medical cares and treatment provided with the primary goal of relieving pain and other symptoms and reducing suffering. Reasonable measures will be made to offer food and fluids by mouth. Medication, turning and repositioning, wound care and other measures will be used to relieve pain and suffering. Oxygen and suctioning of airway will be used as needed for comfort.

- End of Life (EOL) Pathway (see EOL policy)
- If patient has an Automated Implantable Cardioverter Defibrillator (AICD), order deactivation (see policy on Discontinuation of Cardiac Devices)

Transfer of Plan of Care to Post Acute Care

- Our W10 options for plan of care are
 - Code status changed
 - Palliative care consult completed in hospital
 - DNR agreed upon by patient and/or family
 - Code status addressed, continue to address at snf
 - Continue palliative care at snf
 - Palliative care to follow at snf
 - Advance directives completed

Plan of Care Across the Continuum

Palliative Care Imbedded in Organizational Goals

Integrated Care 2014 SCORE CARD

Accountable: Pat Tietjen MD

Jul-14

We will meet bimonthly to review score card, discuss tasks accomplished and planned tasks to move team toward WIG

WIG: Achieve 30-day readmission goals for 5 medical and 2 surgical diagnoses - CHF, PNA, AMI, Stroke, COPD, EKR, EHR

Sub-Project	Quality Admission	Quality Discharge	Partner with ECF/VNA	Quality Stay - LOS	Med Reconciliation	Palliative Care																								
Sub-"A"	Pat Broderick MD	Bob Carr MD	Moreen Donahue, CNO	Aparna Oltikar MD	Eric Jimenez MD / Pat Tietjen MD	Damanjeet Chaubey MD																								
Lagging Indicator	30 Day Readmissions for 5 med/2 sur diagnoses listed below.			1/3rd shift to GMLOS for CHF and COPD achieved in the month of April 2014. This translates to 4.16 days for COPD, and 4.26 days for CHF. Team will sustain this shift for remaining months of FY14, achieving YTD 1/3rd shift to GMLOS by September 30, 2014. Lead Indicator 1	Increase number of referrals to physician home visit program (10 per month).	85% of COPD/CHF Care Coordinator visit within 5 days. 85% of patients discharged to home will have a PCP follow up within 5 days of discharge - selected practices.	Evaluate % of appointments kept for patients discharge to home.	CHF/COPD patients will have a PENDING DISCHARGE ORDER one day before discharge. (Baseline: 7%)	Weekly feedback to physicians not performing med req. requirements.	Number of palliative care follow ups: Base: 30 per month / Goal: 60 per month / YTD:																								
Lead Indicator 2	Increase number of patients discharged from ED who were potential readmits by 10%.	85% of Patient discharged to home will be contact within 48 hours by case manager.	Evaluate % of appointments kept for patients discharged from ECF.			Admit to consult: Base: 5.4 days / Goal: 3 days / YTD: 4.6 days																								
Lead Indicator 3	Use ED Playbook to effective transition patients to home and other support. (used with 25% of potential readmission patients)	85% of patients discharged to home will have their Medication Reconciliation completed at first contact and each readmission case reviewed by Physician and Nurse Navigator.																												
Lead Indicator 4	CHF: Percentage of Cardiology Patients receiving IV Lasix in the WCMG Office. Baseline = 0. Goal = 2 per month.	Develop system of care coordination post discharge from skilled nursing facility.																												

Palliative Care Dashboard

Our team LAG indicator is 30 day readmission rates for patients we have seen. We have seen an increase in our readmission rate, and would like to get back down to the program baseline of less than 10%. The LEAD Indicators that will get us there are increasing our outpatient visits to greater than 60 encounters per month by the 4th quarter. Also, we feel by decreasing the admission to consult to less than 3 days will have a positive impact on our readmission rate.

Our plan to increase our outpatient visits includes services to nursing facilities as well as home visits and oncology office visits. We are expanding our consult service to local nursing facilities to a total of 6 facilities. The expansion allows us to follow our patients across the continuum of care. Our new home care program will allow us to work closely with home care and PCPs to ensure the patients plan of care is being followed.

Readmissions by Diagnosis

CLINICAL METRICS

- Pain Management
- Advanced Care Planning
- Patient diagnosis

Pain Management Following Consult

- Establish baseline percentage of patients who indicate pain on initial consult and report improvement in pain level by at least one level 48 hours following a consult. Goal is 80% of patients with moderate to severe pain will have a reduction in pain at 48 hours

Pain Improvement

	Numerator N=improved pain at 48 hrs	Denominator N=	%improved
April	12	14	85%
May	14	21	70%
June	12	15	80%
July	10	11	91%
August	8	9	89%
September			

Advance Care Planning

- Establish baseline percentage of palliative care patient with documentation of a completed Advance Directive at the time of discharge

Advance Directives

Customer Metrics

Patient and Family Satisfaction

- Establish a process for determining patient/family satisfaction. The goal >50% of patients seen by the palliative care consult service will receive a satisfaction survey phone call, within 2 weeks for live discharges and within 1 month for patients who have died

DANBURY HOSPITAL

Let's get started on the survey:

I know that you or your loved one met many health care providers in the hospital, but I want you to focus on the palliative care team when answering the following questions. For questions that address how well you think the palliative care team did, please respond with excellent, good, fair, or poor. Please let me know if the question doesn't apply to you.

	Excellent (4)	Good (3)	Fair (2)	Poor (1)	Not applicable
1. If pain was an issue, how did the palliative care team do in controlling your/[patient name]'s pain?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. How well did the team do with making sure you or [patient's name] was comfortable during the hospital stay? (Did [patient name] get help with symptoms? Did [patient name] seem comfortable? Was the severity of the symptoms reduced?)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. How well did the team do at giving you information about your or [patient name]'s illness in an understandable and sensitive way?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. How did the team do with involving you and your loved ones in making decisions about treatments and tests?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. How effective was the palliative care team in responding to your and [patient's name] spiritual or religious needs?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6. How did the team do in acknowledging and respecting your cultural traditions? (Any traditions for the way your family makes decisions, or communicates or thinks about illness and medicine that you would want the providers to respect)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
We would also like to get your feedback about the palliative care team. Please answer always, sometimes, not at all, or not applicable to the following questions	Always	Sometimes	Not at all	Not applicable	
7. Was the palliative care team helpful?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8. Was the palliative care team respectful?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
