Complete Step 1: Discuss criteria C&D on the prioritization tool (critical mass)	40	The group identified major partners that are currently working and/or focused on the priority objectives/strategies. Additionally a large number of partners were identified that support those objective areas. For example, it may not be their primary business but they have an interest in the health improvement objective and are frequently partners at meetings on these issues (See attached listing). This will provide the basis for helping to identify a lead on implementing these objective areas.	HRIA/All
