DISEASES FOR ONCOLOGY, VERSION 3, CODES	38

INTRODUCTION

This report includes data on invasive (malignant) cancers diagnosed in 2000-2003 among residents of Connecticut by town of residence at diagnosis, as reported to the Connecticut Tumor Registry. Because of the difficulty in distinguishing “in situ” (pre-invasive) from invasive bladder cancers, bladder cancers reported as “in situ” have been included in reports on invasive cancer from the Connecticut Tumor Registry and from the National Cancer Institute (NCI). “In situ” cancers have not penetrated (microscopically) into deeper layers of the tissue in which the cancer originated, and therefore have little chance of spreading to other tissues or organs.

Numbers of cancers newly diagnosed among Connecticut residents of specific towns are frequently requested from the Registry for various purposes, including assessments for planning for health facilities.

Crude incidence rates, or the number of cancers diagnosed in a specific group divided by the estimated number of persons in the population of the town, can be estimated. These rates are usually expressed as a rate per 100,000 population in each town. However, population estimates by sex for each town are not available beyond the 2000 Census (See Appendix A).

In making comparisons of cancer incidence by geographic area, differences in the age structure of the populations must be considered. Incidence rates are often "age adjusted" (“age standardized”) to take into account changes in the age structure of the population. The "aging" of the population, or the growing numbers of elderly persons, results in increases in total cancer rates because these rates rise with age.

The Connecticut Tumor Registry also periodically publishes data by town that take into account differences in the estimated populations by age group. Data by age group for each sex, or for specific “racial” and/or “Hispanic ethnicity” groups, are not routinely distributed, due to concerns about patient confidentiality.

The numbers and rates in this monograph were obtained from a data file that was prepared in April 2006. It includes some “delayed reports” of cancers (diagnosed in 2003) to the Registry from hospitals and other sources.

The Registry’s system of classifying cancers by groups of “sites” or “types” (See Appendix B) differs slightly from that used in NCI publications. The relevant NCI website (see www.seer.cancer.gov or www.cancer.gov) explains the classification system, and also discusses delayed reporting of cancers to NCI-funded registries.

This report excludes cancers ascertained only from death certificates (“DCO” cancers. For DCO cancers, date of cancer diagnosis is unknown, although NCI data files assign the date of death, and DCOs comprise only 1% of all cancers registered.

Numbers of cancers by town tend to fluctuate from year to year, so that combining several years of data provides statistically more stable data for analysis of time trends. Small numbers of delayed reports for diagnoses in 2000-2003 will continue to be received by the Registry, and the database is continuously updated.

For patients living in rural areas, the only address in the Connecticut Tumor Registry (as usually obtained from a hospital tumor registry) may be a post-office address or box number, which may not be located in the patient’s town of residence. In addition, data for the towns of “Canaan” and “North Canaan” in this report should be combined, because of problems in coding of town of residence in that area.

Data, similar to those in this report, for less common cancer sites or types can be obtained by request from the Registry (860-509-7163).

Appendix A: A NOTE ON Connecticut Population Estimates by Town

Population estimates by town are available from:

Table 5 Annual Estimates of the Population for Minor Civil Divisions in Connecticut, Listed Alphabetically within County: April 1, 2000 to July 1, 2004. SUB-EST2004-05-09)

(Release Date: June 30, 2005)

(Internet www.census.gov)

Only total populations (males and females combined) are tabulated

APPENDIX B

International Classification of Diseases for Oncology, Version 3 (ICD-O-3) Codes

Lymphomas

HODGKIN'S: Morphology codes 9650-9667
NON-HODGKIN'S: Morphology codes 9590-9591,
9670-9729; 9823, 9827 (except for site codes 420, 421, 424)

Excluding Lymphomas

(Morphology codes 9590-9729 are excluded. "C" is part of the
ICD-O site code)

ORAL CAVITY, PHARYNX: C 00.0-14.8.
ESOPHAGUS: C 15.0-15.9.
STOMACH: C 16.0-16.9.
COLON: C 18.0-18.9.
RECTUM, ANUS: C 19.9, 20.9-21.8.
LIVER: C 22.0-22.1.
GALLBLADDER: C 23.9-24.9 (includes extrahepatic bile ducts)
PANCREAS: C 25.0-25.9.
LARYNX: C 32.0-32.9.
TRACHEA, BRONCHUS, LUNG: C 33.9-34.9.
CONNECTIVE TISSUE: C 49.0-49.9.
MELANOMA OF SKIN: C 44.0-44.9, Morphology 8720-8790.
PROSTATE: C 61.9.
FEMALE BREAST: Sex female and C 50.0-50.9.
TESTIS: C 62.0-62.9.
CERVIX UTERUS: C 53.0-53.9.
UTERINE CORPUS, AND UTERUS NOT OTHERWISE
SPECIFIED: C 54.0-54.9. 55.9.
OVARY, ADJACENT STRUCTURES: C 56.9-57.8.
BLADDER: C 67.0-67.9.
KIDNEY, RENAL PELVIS, URETER: C 64.9-66.9.
BRAIN, CENTRAL NERVOUS SYSTEM (CNS):
CEREBRAL MENINGES, CRANIAL NERVES:
C 70.0-71.9, 72.2-72.5.
THYROID: C 73.9.
MULTIPLE MYELOMA: Morphology 9731-9732.
LEUKEMIA: Morphology 9800-9822;9826;9832-9948;9823 and
9827 (site codes 420, 421, 424)
KAPOSI'S SARCOMA: Morphology 9140.
UNKNOWN SITE: C 76.0-76.8, 80.0-80.9 (ill-defined or unknown
primary site).

Reference: Fritz A, Percy C, Jack A et al. (editors) *International Classification of Diseases for Oncology. Third Edition*. Geneva, Switzerland, World Health Organization, 2000.

Note: These groupings for cancer site/type were selected for consistency with past reports from the Connecticut Tumor Registry.
