It also gives callers the ability to utilize menu options via touch tone keypad to have their calls routed to subject matter experts.

APPENDIX

Tiered Telephonic Service Delivery Model

In April 2023, DSS introduced a tiered telephonic service delivery model in anticipation of high call volume stemming from the PHE Unwind eligibility adjustments. A tiered model helps to direct and escalate client calls based on need and complexity. All DSS client calls start with a tier I agent, and when necessary, moved up to a tier II agent.
