ConneCT is an online tool for current DSS clients where they can create an account to access information about their benefits. New clients can also use ConneCT to apply for benefits. ConneCT allows DSS clients to view their benefits such as their application status, which benefits are currently active, which household members are receiving benefits, and notifications about any upcoming redeterminations.

DSS Clients can access their account through the DSS 1.855 line using their unique PIN or via MyDSS mobile platform.

Interactive Voice Response (IVR) is an automated phone system technology that helps callers to access information via a voice response system of pre recorded messages without having to speak to an agent. It also gives callers the ability to utilize menu options via touch tone keypad to have their calls routed to subject matter experts.

APPENDIX

Tiered Telephonic Service Delivery Model

In April 2023, DSS introduced a tiered telephonic service delivery model in anticipation of high call volume stemming from the PHE Unwind eligibility adjustments. A tiered model helps to direct and escalate client calls based on need and complexity. All DSS client calls start with a tier I agent, and when necessary, moved up to a tier II agent.
