Dr. Desai commented; "anterior open bite at #7, anterior cross bite at #10, midline deviation." (Ex. 2: Malocclusion Assessment Record, dated [REDACTED] 2015)

CONCLUSIONS OF LAW

1. Connecticut General Statutes §17b-262 provides that the Department may make such regulations as are necessary to administer the medical assistance program.
2. Connecticut Agencies Regulations §17-134d-35(a) provide that orthodontic services for services provided for individuals less than 21 years of age will be paid for when provided by a qualified dentist and deemed medically necessary as described in these regulations.
3. Connecticut General Statutes § 17b-259b provides (a) For purposes of the administration of the medical assistance programs by the Department of

- Social Services, "medically necessary" and "medical necessity" mean those health services required to prevent, identify, diagnose, treat, rehabilitate or ameliorate an individual's medical condition, including mental illness, or its effects, in order to attain or maintain the individual's achievable health and independent functioning provided such services are: (1) Consistent with generally-accepted standards of medical practice that are defined as standards that are based on (A) credible scientific evidence published in peer-reviewed medical literature that is generally recognized by the relevant medical community, (B) recommendations of a physician-specialty society, (C) the views of physicians practicing in relevant clinical areas, and (D) any other relevant factors; (2) clinically appropriate in terms of type, frequency, timing, site, extent and duration and considered effective for the individual's illness, injury or disease; (3) not primarily for the convenience of the individual, the individual's health care provider or other health care providers; (4) not more costly than an alternative service or sequence of services at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of the individual's illness, injury or disease; and (5) based on an assessment of the individual and his or her medical condition.
4. Public Act 15-5 (June Sp. Session, Section 390) provides, in relevant part, as follows: " The Department of Social Services shall cover orthodontic services for a Medicaid recipient under twenty-one years of age when the Salzmann Handicapping Malocclusion Index indicates a correctly scored assessment for the recipient of twenty-six points or greater, subject to prior authorization requirements. If a recipient's score on the Salzmann Handicapping Malocclusion Index is less than twenty-six points, the Department of Social Services shall consider additional substantive information when determining the need for orthodontic services, including (1) documentation of the presence of other severe deviations affecting the oral facial structures; and (2) the presence of severe mental, emotional or behavioral problems or disturbances, as defined in the most current edition of the Diagnostic and Statistical Manual of Mental Disorders, published by the American Psychiatric Association, that affects the individuals daily functioning."
 5. Connecticut Agencies Regulations §17-134d-35(f) provide that the study models submitted for prior authorization must clearly show the occlusal deviations and support the total point score of the preliminary assessment.
 6. ████████ study models submitted for prior authorization do not show severe occlusal deviations affecting the mouth and underlying structures; and do not meet the requirement of a 26 point score on the preliminary assessment.

7. [REDACTED] has not been recommended by a licensed psychiatrist or psychologist, that she receive orthodontic treatment to significantly ameliorate mental, emotional, and or behavior problems, disturbances or dysfunctions.
8. BeneCare was correct to deny prior authorization because [REDACTED] does not meet the medical necessity criteria for orthodontic services, in accordance with state statutes and regulations.

DISCUSSION

State regulations provide that when a child is correctly scored with at least 26 points on a Preliminary Handicapping Malocclusion Assessment Record, a test measuring severity of malocclusion and dentofacial deformity, the Medicaid program will authorize and pay for orthodontic treatment. The treating orthodontist scored the malocclusion of [REDACTED] teeth to equal 13 points. Two dentists in blind reviews independently assessed [REDACTED] models and x-rays and scored the malocclusion to equal 13 and 12 points. It is reasonable to conclude that the models do not support the severity of malocclusions and dentofacial deformity.

The Appellant did not provide any other evidence of a substantial nature to indicate the presence of other severe deviations affecting the mouth and underlying structures. A licensed psychiatrist or licensed psychologist has not recommended that [REDACTED] receive orthodontic treatment to significantly ameliorate her mental, emotional, and or behavior problems, disturbances or dysfunctions.

The undersigned hearing officer finds that [REDACTED] malocclusion did not meet the requirement for severity, or 26 points, as established in state regulations to allow the Medicaid program to pay for orthodontic services.
