PROCEDURAL BACKGROUND

On ██████████ 2017, BeneCare Dental Plans (“BeneCare”) administered by the Connecticut Dental Health Partnership (“CTDHP”), sent ██████████ (the “Appellant”) a notice of action denying a request for prior authorization of orthodontia services for her minor child, ██████████, indicating that the severity of ██████████ malocclusion did not meet the requirements in state law to approve the proposed treatment, and that orthodontia was not medically necessary.

On ██████████ 2017, the Office of Legal Counsel, Regulations, and Administrative Hearings (“OLCRAH”) issued a notice scheduling the administrative hearing for ██████████ 2017.

### **CONCLUSIONS OF LAW**

1. Connecticut General Statutes §17b-262 provides that the Department may make such regulations as are necessary to administer the medical assistance program.
2. Connecticut Agencies Regulations §17-134d-35(a) provide that orthodontic services for services provided for individuals less than 21 years of age will be paid for when provided by a qualified dentist and deemed medically necessary as described in these regulations.
3. Connecticut General Statutes § 17b-259b provides (a) For purposes of the administration of the medical assistance programs by the Department of

- Social Services, "medically necessary" and "medical necessity" mean those health services required to prevent, identify, diagnose, treat, rehabilitate or ameliorate an individual's medical condition, including mental illness, or its effects, in order to attain or maintain the individual's achievable health and independent functioning provided such services are: (1) Consistent with generally-accepted standards of medical practice that are defined as standards that are based on (A) credible scientific evidence published in peer-reviewed medical literature that is generally recognized by the relevant medical community, (B) recommendations of a physician-specialty society, (C) the views of physicians practicing in relevant clinical areas, and (D) any other relevant factors; (2) clinically appropriate in terms of type, frequency, timing, site, extent and duration and considered effective for the individual's illness, injury or disease; (3) not primarily for the convenience of the individual, the individual's health care provider or other health care providers; (4) not more costly than an alternative service or sequence of services at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of the individual's illness, injury or disease; and (5) based on an assessment of the individual and his or her medical condition.
4. Connecticut General Statutes § 17b-259b(b) provides that clinical policies, medical policies, clinical criteria or any other generally accepted clinical practice guidelines used to assist in evaluating the medical necessity of a request health service shall be used solely as guidelines and shall not be the basis for a final determination of medical necessity.
  5. Connecticut General Statutes Supplement § 17b-282(e) provides that the Department of Social Services shall cover orthodontic services for a Medicaid recipient under twenty-one years of age when the Salzmann Handicapping Malocclusion Index indicates a correctly scored assessment for the recipient of twenty-six points or greater, subject to prior authorization requirements. If a recipient's score on the Salzmann Handicapping Malocclusion Index is less than twenty-six points, the Department of Social Services shall consider additional substantive information when determining the need for orthodontic services, including (1) documentation of the presence of other severe deviations affecting the oral facial structures; and (2) the presence of severe mental, emotional or behavioral problems or disturbances, as defined in the most current edition of the Diagnostic and Statistical Manual of Mental Disorders, published by the American Psychiatric Association, that affects the individuals daily functioning.
  6. Connecticut Agencies Regulations § 17-134d-35(b)(3) define the Preliminary Handicapping Malocclusion Assessment Record as the method of determining the degree of malocclusion and eligibility for orthodontic services. Such assessment is completed prior to performing the comprehensive diagnostic assessment.

7. Connecticut Agencies Regulations § 17-134d-35(e)(2) provides in relevant part that [when a mental disorder is being considered] “the Department will only consider cases where a diagnostic evaluation has been performed by a licensed psychiatrist or licensed psychologist who has accordingly limited his practice to child psychiatry or child psychology. The evaluation must clearly and substantially document how the dentofacial deformity is related to the child’s mental, emotional, and/or behavior problems, and the orthodontic treatment is necessary, and, in this case, will significantly ameliorate the problems.”
8. Connecticut Agencies Regulations §17-134d-35(f) provide that the study models submitted for prior authorization must clearly show the occlusal deviations and support the total point score of the preliminary assessment.
9. ██████████ study models submitted for prior authorization do not show severe occlusal deviations affecting the mouth and underlying structures; and do not meet the requirement of a 26 point score on the preliminary assessment.
10. ██████████ has not been recommended by a licensed psychiatrist or psychologist, that she receive orthodontic treatment to significantly ameliorate mental, emotional, and or behavior problems, disturbances or dysfunctions.
11. BeneCare was correct to deny prior authorization because ██████████ does not meet the medical necessity criteria for orthodontic services, in accordance with state statutes and regulations.
12. On ██████████ 2017, BeneCare correctly issued the Appellant a notice of action denying the Appellant’s appeal review request for orthodontia treatment for ██████████

### DISCUSSION

State regulations provide that when a child is correctly scored with at least 26 points on a Preliminary Handicapping Malocclusion Assessment Record, a test measuring severity of malocclusion and dentofacial deformity, the Medicaid program will authorize and pay for orthodontic treatment. The treating orthodontist scored the malocclusion of ██████████ teeth to equal 24 points. Two dentists in blind reviews independently assessed ██████████ models and x-rays and scored the malocclusion to equal 18 and 17 points. It is reasonable to conclude that the models do not support the severity of malocclusions and dentofacial deformity.

The Appellant did not provide any other evidence of a substantial nature to indicate the presence of other severe deviations affecting the mouth and underlying structures. [REDACTED] is not receiving any treatment by a licensed psychiatrist or psychologist and it has not been recommended that she receive orthodontic treatment to significantly ameliorate her mental, emotional, and or behavior problems, disturbances or dysfunctions.

The undersigned hearing officer finds that [REDACTED] malocclusion did not meet the requirement for severity, or 26 points, as established in state regulations to allow the Medicaid program to pay for orthodontic services.
