CONCLUSIONS OF LAW

1. Section 17b-2 of the Connecticut General Statutes authorizes the Commissioner of the Department of Social Services to administer the Medicaid program.

2. Conn. Agencies Regs. Section 17b-262-707 (a) provides that "the department shall pay for an admission that is medically necessary and medically appropriate as evidenced by the following:

    (1) certification by a licensed practitioner that a client admitted to a nursing facility meets the criteria outlined in section 19-13-D8t(d)(1) of the Regulations of Connecticut State Agencies. This certification of the need for care shall be made prior to the department's authorization of payment. The licensed practitioner shall use and sign all forms specified by the department;
    (2) the department's evaluation and written authorization of the client's need for nursing facility services as ordered by the licensed practitioner;
    (3) a health screen for clients eligible for the Connecticut Home Care Program for Elders as described in section 17b-342-4(a) of the Regulations of Connecticut State Agencies;
    (4) a preadmission MI/MR screen signed by the department; or an exemption form, in accordance with 42 CFR 483.106(b), as amended from time to time, for any hospital discharge, readmission or transfer for which a preadmission MI/MR screen was not completed; and

    (ii) That a patient admitted to a rest home with nursing supervision has controlled and/or stable chronic conditions which require minimal skilled nursing services, nursing supervision, or assistance with personal care on a daily basis.

5. Section 17b-259b of the Connecticut General Statures states that "Medically necessary" and "medical necessity" defined. Notice of denial of services. Regulations.

    (a) For purposes of the administration of the medical assistance programs by the Department of Social Services, "medically necessary" and "medical necessity" mean those health services required to prevent, identify, diagnose, treat, rehabilitate or ameliorate an individual's medical condition, including mental illness, or its effects, in order to attain or maintain the individual's achievable health and independent functioning provided such services are: (1) Consistent with generally-accepted standards of medical practice that are defined as standards that are based on (A) credible scientific evidence published in peer-reviewed medical literature that is generally recognized by the relevant medical community, (B) recommendations of a physician-specialty society, (C) the views of physicians practicing in relevant clinical areas, and (D) any other relevant factors; (2) clinically appropriate in terms of type, frequency, timing, site, extent and duration and considered effective for the individual's illness, injury or disease; (3) not primarily for the convenience of the individual, the individual's health care provider or other health care providers; (4) not more costly than an alternative service or sequence of services at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of the individual's illness, injury or disease; and (5) based on an assessment of the individual and his or her medical condition.

    (b) Clinical policies, medical policies, clinical criteria or any other generally accepted clinical practice guidelines used to assist in evaluating the medical necessity of a requested health service shall be used solely as guidelines and shall not be the basis for a final determination of medical necessity. (c) Upon denial of a request for

authorization of services based on medical necessity, the individual shall be notified that, upon request, the Department of Social Services shall provide a copy of the specific guideline or criteria, or portion thereof, other than the medical necessity definition provided in subsection (a) of this section, that was considered by the department or an entity acting on behalf of the department in making the determination of medical necessity.

Ascend Correctly used clinical and guidelines solely as screening tools.

Ascend Correctly requested the Practitioner Certification signed by the Facility's physician.

The Facility failed to provide the signed Practitioner Certification.

Ascend Correctly determined that It was unable to complete its review to determine whether NFLOC was medically necessary for the Appellant and issued a Notice of Closure of screening request indicating that Ascend could not complete its review because the submitter did not provide signed MD certification required pursuant to the regulations of Connecticut State Agencies 17b-262-707.
