Total Points				13.875	27.000
Aggregate Quality Score (Total Quality Score/Total Possible Points)			51.39%		

### Notes:

- 1. Maintain Quality points are awarded if a PE's 2017 rate is greater than or equal to its 2016 rate.
- 2. Improve Quality points are awarded for a PE's 2017 over 2016 improvement trend on a sliding scale compared to the comparison group improvement trend.
- 3. Absolute Quality points are awarded for a PE's ability to reach absolute quality targets, which are derived from the comparison group's 2015 rates.
- 4. DNQ (Does Not Qualify) values occur when a denominator count is less than 30.
- 5. Both Prenatal and Postpartum Care are scored separately and are weighted equally at 1.500 total possible points.
- 6. Aggregate Quality Scores are not final, as 2017 PCMH CAHPS scores are still being processed. Points for PCMH CAHPS are not included in this summary.

### **Quality Measure Description**

The percentage of children screened for risk of developmental, behavioral, and social delays using a standardized screening tool in the first three years of life. This is a measure of screening in the first three years of life that includes three, age-specific indicators assessing whether children are screened by 12 months of age, by 24 months of age, and by 36 months of age.

### Notes

### **Quality Measure Description**

For Medicaid members age 0 to 64, total readmissions within 30 days after discharge from hospital. This measure is based on AHRQ and CMS approved specifications developed by Medicaid Medical Directors Network (MMDN) for Medicaid patients only. The measure aggregates the results for Physical Health only, Physical Health and Behavioral Health combined, by age, gender, race/ethnicity and by Major Diagnosis Category. It assesses the overall readmission rate by 4 populations: Pediatric OB, Pediatric Non-OB, Adult OB, Adult Non-OB with the age break out of Age Under 1, Age 1-12, Age 13-20, Age 21-44 and Age 45-64. Dual Eligible members are excluded.

### Notes
