In this section you can see your test results, along with the name of the provider who requested that the test be done. Click a row to see additional details. At this time, certain results that are scanned into the system may not be viewable in MyChartPLUS. Please be advised that some results are released to this portal at the same time they become available to your provider, and the provider may not have had an opportunity to review them yet. Please allow a few days for them to contact you, via a MyChartPLUS message, an office visit, a phone call, etc. Tests performed during a hospital stay, a visit to an Emergency Department, or certain other special situations may not result in a contact from the ordering provider. Please be assured that any results that require immediate action will be brought to the provider's attention in a timely manner.

Result is from another organization

What is Health Information Exchange?

➤ **Health information exchange** (*verb*) – process of sharing health information electronically¹

➤ **Health Information Exchange** (*noun*) – organization that provides technology and services to allow their stakeholders to securely share health information¹

¹<https://strategichie.com/about/#1601563275277-109c4b48-8320>

About Connie

Independent, not-for-profit, neutral and trusted organization authorized by State statute (CGS 17b-59d and 17b-59g) to develop and operate the statewide HIE in Connecticut

Network-of-networks model to enable exchange of clinical information across all health care settings

Statewide leader for adoption of HIE shared services that bring meaningful and sustainable value

Promote trust by establishing common “rules of the road” for guiding governance and operations activities

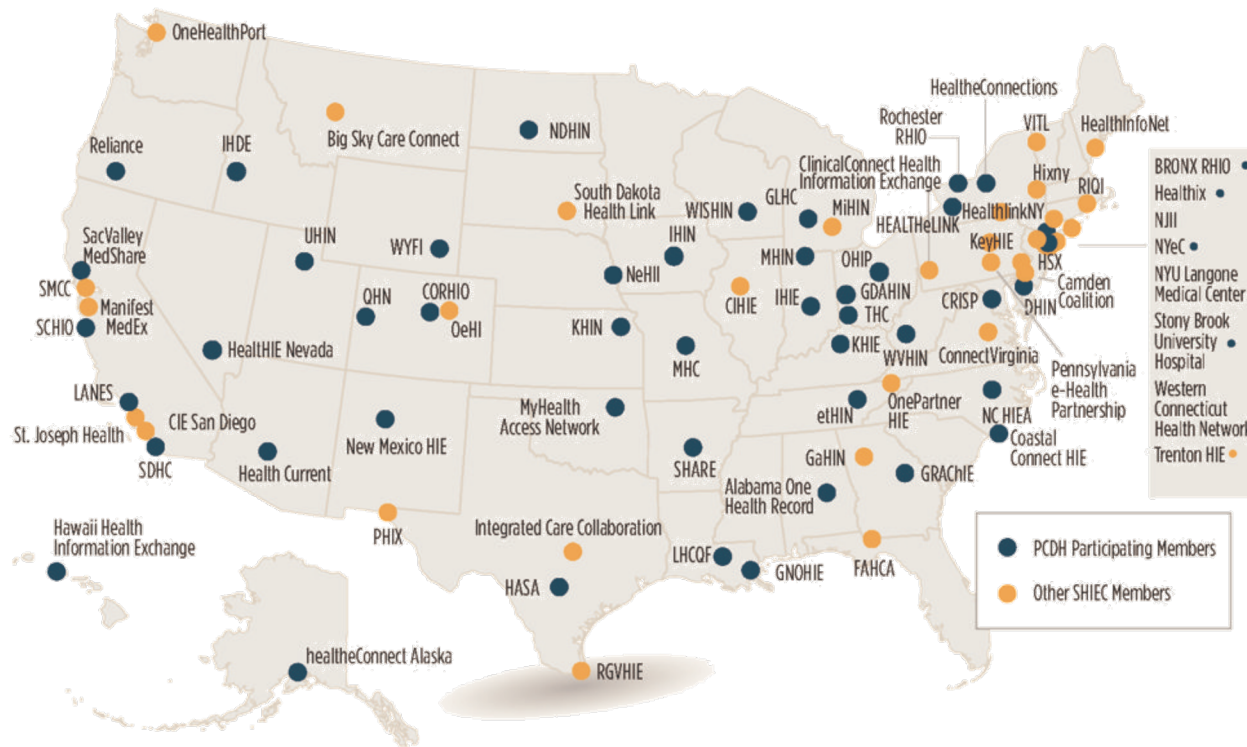

Connie was established to:

- **Enable the better sharing** of clinical information across all healthcare settings
- **Support care coordination** between healthcare settings
- **Reduce preventable harm and costs** associated with readmissions, duplicative testing, and errors
- **Support public health reporting**, research and population health analytics
- **Adhere to and promote standards and interoperability**
- **Provide patient access to their own health information**
