

DVA COVID-19 Update: December 3, 2021

The Department of Veterans Affairs (DVA) Healthcare Center (HCC) has one Veteran Patient with COVID-19 who is being treated at the West Haven Federal VA Hospital. This Veteran had been in protective isolation after returning from out of state travel minimizing the risk of transmission to HCC staff and Veterans. The HCC conducted additional COVID-19 testing with all results being negative. All masking, distancing/barriers and heightened hygienic and cleaning procedures remain in place and increased COVID-19 testing will continue until further notice. We continue implementation of DPH's and the Governor's directives for new employees regarding mandatory vaccinations and the limited allowed exceptions. Any HCC staff member granted a religious or medical COVID vaccine exemption is required to provide a negative COVID PCR test each week and are subject to additional COVID testing performed at the HCC and must wear elevated levels of PPE particularly when interacting with Veteran Patients.

The DVA Residential Facility has not had a COVID-19 positive Veteran Resident in more than eight months and unvaccinated Veteran Residents (currently only one Veteran) and all Veteran Vocational Therapeutic Program (VVTP) participants tested negative for COVID-19 two weeks ago. We continue monthly testing of unvaccinated Veteran Residents and all VVTP participants with the next test scheduled for December 14th. There are no Veteran Residents in the COVID-19 positive section or the protective monitoring section of the Isolation Unit. Regular on and off Campus recreational and therapeutic activities continue for Veteran Residents including shopping, fishing trips, theater trips, bowling, hiking and attending community based civic and Veteran Service Organization events.

Since the Pandemic began, the DVA has provided direct care to two hundred and sixty-three Veteran Residents and Veteran Patients at our Campus of whom seventy-six tested positive or retested positive for COVID-19 since March 2020. Of those testing positive, sixty-nine recovered from the virus. One Veteran Resident and two Veteran Patients passed away in the spring of 2020 due to COVID-19, and a Veteran Patient passed away in December 2020 and one in January 2021 from COVID-19 complications. One Veteran Patient with COVID-19 passed away in December 2020 from a non-COVID-19 related medical occurrence.

Of the seventy-eight DVA staff members contracting or re-contracting COVID-19 since the beginning of the pandemic, seventy-six have recovered and returned to work. Two staff members are recovering at home and will return to work consistent with DVA clinical protocols. The DVA vaccine initiative remains highly effective with approximately eighty-nine percent of staff having received their first COVID vaccine dose and eighty percent being fully vaccinated with twenty-five percent having received a booster vaccine (periodic drops in vaccination rates are due to new staff pending vaccinations). Our on Campus Vaccine clinics continue to offer initial vaccines in addition to administering COVID-19 vaccine boosters to eligible Veteran Patients, Veteran Residents, and staff along as well as Flu vaccines.

The current DVA COVID-19 Mitigation Protocols, previous COVID-19 weekly updates and other information is available at: <https://portal.ct.gov/DVA/Pages/DVA-COVID-19-Updates>.
