

**COVID-19 Agency Update**  
**October 2, 2020**

The Department of Veterans Affairs (DVA) Healthcare Center (HCC) has no COVID-19 positive Veteran Patients in its Isolation and Recovery Unit and there have been no new Veteran Patients testing positive for COVID-19 in several months. There are two Veteran Patients in the HCC Isolation Unit, both of whom have tested negative for the virus, however as they are new admissions or patients who recently returned from an acute care facility, they will remain in the Isolation Unit until cleared by clinical staff for release after additional COVID-19 tests and monitoring. Several other Veteran Patients have been transferred from the Isolation Unit to their rooms after completing a protective monitoring period and testing negative for COVID-19.

The DVA Residential Facility has no COVID-19 positive Veteran Residents in its Isolation Recovery Unit and no new Veteran Residents have tested positive for COVID-19 in several months. The DVA Residential Facility completed two rounds of COVID-19 testing of all Residential Veterans in July and September with all Veterans testing negative for COVID-19. The next one day testing of all Veteran Residents is scheduled for October 14<sup>th</sup> with additional all Veteran Resident testing to be conducted in November and December. This approach, known as “Point Prevalence Testing”, is one of the many protocols the DVA has implemented in our rigorous efforts to mitigate the potential spread of COVID-19.

To date, the DVA has tested two hundred and thirty-three Veteran Residents and Patients (most tested multiple times) for COVID-19 with twenty-five testing positive, nearly all being early in the pandemic. Of the twenty-five Veterans who tested positive, twenty-two recovered from the virus. One Veteran Resident and two Veteran Patients passed away in late April and early May due to COVID-19 complications. A total of six staff members tested positive for COVID-19 since the beginning of the pandemic, most occurring early in the pandemic, with all recovering and returning to work consistent with CDC and DPH guidelines.

In addition to ongoing testing of Veterans, the DVA has conducted COVID-19 testing of all direct care and front-line staff every Thursday since July 9<sup>th</sup> and will continue such weekly testing until at least the end of the year. The DVA Veteran and staff testing results to date, demonstrates that our COVID-19 mitigation protocols, including rapid isolation and contact tracing for any positive tests, wearing masks, screening and ongoing testing are keeping our Veterans and staff safe.

DVA COVID-19 Protocols and modifications, along with all prior agency COVID-19 updates and other important information are available at: <https://portal.ct.gov/DVA/Pages/DVA-COVID-19-Updates>.
