CRIME IN CONNECTICUT January – December 2020

HONORABLE NED M. LAMONT

GOVERNOR STATE OF CONNECTICUT

JAMES C. ROVELLA

COMMISSIONER
DEPARTMENT OF EMERGENCY SERVICES AND PUBLIC PROTECTION

CONNECTICUT STATE POLICE

CRIMES ANALYSIS UNIT UNIFORM CRIME REPORTING PROGRAM

Publication Date: October, 2021

Acknowledgments

The Connecticut Uniform Crime Reporting Program has been collecting crime data throughout the State since its inception in 1977. The success of the program has been a result of the complete support of Connecticut Chiefs of Police and the Connecticut State Police Crimes Analysis staff.

Crime in Connecticut 2020 is the 43rd annual crime report that the Department of Emergency Services and Public Protection has published. This annual report continues to be the most comprehensive source of crime related data for the State of Connecticut.

Any comments on this publication can be directed to:

Department of Emergency Services and Public Protection Crimes Analysis Unit, 1111 Country Club Road Middletown, CT 06457

Phone: 860-685-8030 Email: ctnibrs@ct.gov

DEDICATION 2020

This publication is dedicated to
THE MEMORY OF ALL LAW ENFORCEMENT OFFICERS
LOCAL, STATE, AND FEDERAL
WHO LOST THEIR LIVES WHILE On DUTY
SERVING THE CITIZENS OF THE STATE OF CONNECTICUT.

Trooper First Class Eugene Kenneth Brown Jr. Connecticut State Police

TFC Brown died May 25, 2020 from 9/11 related injuries.

A memorial was erected in 1989 At the Connecticut Police Academy in Meriden IN REMEMBRANCE OF THESE FALLEN HEROES. THE "ROLL OF HONOR" LISTS THEIR NAMES AND THEIR "END OF WATCH" DATES.

FORWARD

The 2020 publication of Crime in Connecticut is the 43rd in a series of annual reports dating back to 1978. Crime in Connecticut continues to be Connecticut's most comprehensive compilation of crime data, providing detailed statistics on criminal offenses and arrests statewide. The publication's source data are based upon monthly reporting of crime activity to the Uniform Crime Reporting (UCR) Program at the Connecticut Department of Emergency Services and Public Protection. Crime in Connecticut provides police departments, administrators, legislators, advocacy groups, and the general public with important information for planning purposes.

The Connecticut Department of Emergency Services and Public Protection are proud to have 100 percent participation of data contributors in the Connecticut UCR program. Connecticut law enforcement has consistently provided the necessary resources to make the Connecticut UCR program one of the most effective programs in the United States.

The Department of Emergency Services and Public Protection sincerely appreciates the continued support of law enforcement in the Connecticut UCR Program. We offer special thanks to all sworn and civilian personnel in Connecticut who have dedicated their time and effort to make this publication a continuing success.

UCR Program Description

Connecticut UCR Program

Purpose

The Uniform Crime Reporting Program (UCR) periodically measures crime in the United States. It does this by counting offenses brought to the attention of law enforcement agencies. The program's objective is to produce reliable crime statistics for law enforcement administration, operations, and management. Criminal justice professionals, legislators, scholars, and others concerned with crime problems make frequent use of UCR generated statistics. The UCR Program measures the extent, fluctuation, and distribution of crime in the United States.

National Program

UCR began in 1929 when the International Association of Chiefs of Police (IACP) standardized procedures for crime data collection. On June 11, 1930, Congress enacted legislation authorizing the Federal Bureau of Investigation (FBI) to collect nationwide crime counts and to serve as the clearinghouse for such data.

During the planning of the program, there was recognition that there were differences among criminal codes. This precluded the possibility of computing a national crime total by adding up local statistics. There are variances in punishment for the same offenses in different jurisdictions. No distinction between felony and misdemeanor crimes was possible. Standardized offense definitions were formulated to avoid these problems and to provide nationwide uniformity in crime reporting. Law enforcement agencies were to submit data according to these definitions, without regard for local statutes.

There were seven offenses chosen to serve as an index for gauging fluctuations in the overall volume and rate of crime. These offenses became the Crime Index. It includes the violent crimes of murder, rape, robbery, and aggravated assault. It also includes the property crimes of burglary, larceny-theft, and motor vehicle theft. Congress modified the Crime Index in 1979 when it added the crime of arson.

The FBI expanded the definition of rape in 2013. The definition of rape for Summary UCR purposes is "Penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim."

The Criminal Justice Information Systems (CJIS) Committees of the IACP and the National Sheriffs' Association (NSA) provide vital links between local law enforcement and the FBI in the oversight of the UCR Program. The IACP represents thousands of police departments nationwide. The NSA serves sheriffs throughout the country. These two groups encourage agencies to participate fully in the program. They also advise on the UCR Program's operation.

There is also an Advisory Policy Board (APB) to address all issues regarding the FBI's criminal justice information services. The APB ensures a continued emphasis on UCR-related issues.

In addition, the Association of State Uniform Crime Reporting Programs (ASUCRP) focuses on UCR issues within state law enforcement. It also promotes interest in the UCR Program. These organizations foster the widespread and responsible use of uniform crime statistics and lend assistance to data contributors when needed.

The UCR program also includes the sub-programs of Law Enforcement Officers Killed or Assaulted (LEOKA) in the line of duty and hate crimes, which are bias-motivated offenses. These data collections are separate from, and in addition to, the routine Summary UCR submission. LEOKA data is included in this report. Hate crime data is presented in a separate report.

On January 1, 2021, the FBI retired its Summary Reporting System (SRS). After this date, it will collect crime data only through its National Incident Based Reporting System (NIBRS). In NIBRS, crime data is collected and reported on an incident level. This permits cross-tabular statistics (e.g., the number of incidents in which a white juvenile male used a firearm to rob a convenience store after midnight).

State Program

In July 1977, Connecticut began its own state UCR program. Data collection began with the recruitment and training of 70 agencies. Today, all agencies (107 agencies) participate in the UCR program.

At the time of publication, all Connecticut law enforcement agencies report NIBRS data to the statewide crime repository. This was in response to the FBI retiring the Summary Reporting System. Note that during the time period covered in this report, data was collected using both the Summary and NIBRS format.

Because some agencies report using the Summary format and some agencies report using the NIBRS format to report statewide totals, all statistics are presented in Summary format. It is possible to convert NIBRS data to the Summary format. It is not possible to convert Summary data to NIBRS.

The Mashantucket Tribal Nation and the Mohegan Tribal Nation joined the Connecticut program in 2014, when they were credentialed as local police departments. The Department of Motor Vehicles and Ledyard Police Department began reporting as stand-alone agencies in 2016. East Lyme Police Department began reporting as a stand-alone agency in 2017.

Connecticut implemented the updated rape definition January 1, 2014.

Drunkenness and Runaway are not crimes in CT. The data was captured at one time, and occasionally arrests are coded as one of these two things.

The state program ensures quality control and uniformity of the crime and arrest reports submitted. Centralized state collection streamlines the time-consuming process of resolving questions between contributors and verifiers. Upon completion of the quality-control process, the state program forwards the information to the FBI.

Verification Procedure

Incoming reports are examined for adherence to program rules. State program personnel apply logical tests that are of key importance to confirming validity. Necessary adjustments or unusual variations are brought to the attention of the submitting agency.

Types of Data Collected

Every month, law enforcement agencies throughout the state submit UCR data. They indicate the number of offenses brought to their attention through such sources as victim, police, or witness reports.

Contributors provide the number of "actual offenses" minus any unfounded complaints and the number of crimes cleared. For a criminal offense to be "cleared," either of the following situations must prevail: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) some element beyond police control precludes the physical arrest of the offender (e.g., death of offender, victim refuses to cooperate, confession by offender already in police custody), resulting in the offense being cleared by "exceptional means." Contributing agencies also include data on the value of property stolen and recovered in connection with the reported offenses. In addition, agencies contribute specific information regarding homicides, officers assaulted, and arson.

The program also collects arrest data for all crimes except traffic violations. This information includes the age, sex, and race of arrestees.

UCR Limitations

There are inherent limitations in current Crime-reporting practices. How much crime the public reports is of primary importance in determining the completeness of the data. The degree to which the public reports crimes varies from area to area. A considerable volume of crime is not reported to law enforcement agencies. The victims consider the offenses against them to be of very little consequence. They may think that the likelihood of apprehending the suspect is small. They may also fear retaliation from offenders, or in fact, be a participant in a crime, e.g., a prostitute who has been robbed. Even with these limitations, the UCR Program provides the best network of actual state and national crime figures currently available.

Crime Factors

The UCR program does not measure or consider all factors that have an impact on crime. Superficial conclusions are sometimes drawn from crime and arrest data, particularly when attempts are made to compare jurisdictions. Local ordinances and criminal justice administrative policies, record-keeping practices, and the degree of adherence to UCR standards all affect the number of crimes and arrests reported. Additionally, socioeconomic conditions and the characteristics and attitudes of the local population influence the extent and nature of criminal behavior in a community. Factors to take into consideration include:

- Density and size of the community population and its surrounding area
- Variations in the composition of the population, particularly its age, sex, and race characteristics
- Stability of population with respect to such factors as commuters, seasonal residents, and other transient groups
- Economic conditions, including unemployment
- Cultural conditions, such as educational, recreational, and religious characteristics
- Climate (weather fluctuations)
- The trafficking and abuse of drugs in the community
- Effective strength of law enforcement agencies
- Administrative and investigative efficiency of the local law enforcement agency
- Policies of other components of the criminal justice system such as prosecutorial, judicial, correctional
- Attitudes of citizens toward crime
- Crime reporting practices of citizens

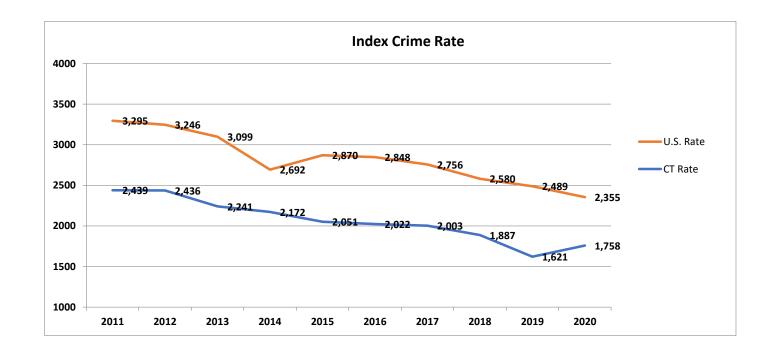

Address questions regarding Summary UCR, NIBRS, or new directions in crime reporting to: Department of Emergency Services & Public Protection

Connecticut State Police Facilities

FBI UNIFORM CRIME SUMMARY SYSTEM REPORTING PROGRAM DEFINITIONS AND TERMS

Part I Offenses

Murder & Nonnegligent Manslaughter-The willful killing of one human being by another.

Negligent Manslaughter-The killing of another person through gross negligence.

Rape-Penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.

Robbery-The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated Assault-An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm.

Burglary-The unlawful entry of a structure to commit a felony or a theft.

Larceny-The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another.

Motor Vehicle Theft-The theft or attempted theft of a motor vehicle.

Arson-Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

*Human Trafficking/Commercial Sex Acts-Inducing a person by force, fraud or coercion to participate in commercial sex acts, or in which the person induced to perform such act(s) has not attained 18 years of age.

*Human Trafficking/Involuntary Servitude-Obtaining of a person(s) through recruitment, harboring, transportation, or provision, and subjecting such persons by force, fraud, or coercion into involuntary servitude, peonage, debt bondage, or slavery (not to include commercial sex acts).

Part II Offenses

Other Assaults (Simple)-Assaults which are not of an aggravated nature and do not result in serious injury to the victim.

Forgery and Counterfeiting-The altering, copying, or imitating of something, without authority or right, with the intent to deceive or defraud by passing the copy or thing altered or imitated as that which is original or genuine; or the selling, buying, or possession of an altered, copied, or imitated thing with the intent to deceive or defraud.

Fraud-The intentional perversion of the truth for the purpose of inducing another person or other entity in reliance upon it to part with something of value or to surrender a legal right. Fraudulent conversion and obtaining of money or property by false pretenses.

Embezzlement-The unlawful misappropriation of misapplication by an offender to his/her own use of purpose of money, property, or some other thing of value entrusted to his/her care, custody, or control.

Stolen Property: Buying, Receiving, Possessing-Buying, receiving, possessing, selling, concealing, or transporting any property with the knowledge that it has been unlawfully taken, as by burglary, embezzlement, fraud, larceny, robbery, etc.

^{*}Data on Human Trafficking is contained in this report

Part II Offenses, continued

Vandalism-To willfully or maliciously destroy, injure, disfigure, or deface any public or private property, real or personal, without the consent of the owner or person having custody or control by cutting, tearing, breaking, marking, painting, drawing, covering with filth, or any other such means as may be specified by local law.

Weapons: Carrying, Possessing, etc.-The violation of laws or ordinances prohibiting the manufacture, sale, purchase, transportation, possession, concealment or use of firearms, cutting instruments, explosives, incendiary devices, or other deadly weapons.

Prostitution and Commercialized Vice-The unlawful promotion of or participation in sexual activities for profit. To solicit customers or transport persons for prostitution purposes; to own, manage, or operate a dwelling or other establishment for the purpose of providing a place where prostitution is performed; or to otherwise assist or promote prostitution.

Sex Offenses (Except Rape, Prostitution)-Offenses against chastity, common decency, morals, and the like, including attempts to commit any of the above.

Drug Abuse Violations-The violation of laws prohibiting the production, distribution, and/or use of certain controlled substances and the equipment or devices utilized in their preparation and/or use. The unlawful cultivation, manufacture, distribution, sale, purchase, use, possession, transportation, or importation of any controlled drug or narcotic substance.

Gambling-To unlawfully operate, promote, or assist in the operation of a game of chance, lottery, or other gambling activity.

Offenses Against the Family and Children-Unlawful nonviolent acts by a family member (or legal guardian) that threaten the physical, mental, or economic well-being or morals of another family member.

Driving Under the Influence (DWI)-Driving or operating a motor vehicle or common carrier while mentally or physically impaired as the result of consuming an alcoholic beverage or using a drug or narcotic.

Liquor Laws-The violation of state or local laws or ordinances prohibiting the manufacture, sale, purchase, transportation, possession, or use of alcoholic beverages, not including driving under the influence and drunkenness.

Disorderly Conduct-Any behavior that tends to disturb the public peace or decorum, scandalize the community, or shock the public sense of morality.

Vagrancy-The violation of a court order, regulation, ordinance, or law requiring the withdrawal of persons from the streets or other specified areas; prohibiting persons from remaining in an area or place in an idle or aimless manner; or prohibiting persons from going from place to place without visible means of support.

All Other Offenses-All violations of state or local laws not specifically identified as Part I or Part II offenses, except traffic violations.

Curfew and Loitering Laws (Persons under age 18)-Violations by juveniles of local curfew or loitering ordinances.

Runaways (Persons under age 18)-Limited to juveniles taken into protective custody as runaways under provisions of local statutes.

Technical Terms

Arrest Rate-The number of arrests reported for each unit of population (per 100,000 persons in this publication).

Classifying-Determining the correct UCR Part I or Part II offense category based on the facts contained in the police investigation report.

Clearance Rate (% Cleared; % Clr)-The percentage of offenses cleared which is obtained by dividing the number of clearances made in any particular offense category by the number of offenses reported in that category.

Cleared by Arrest-For UCR purposes, an offense is considered cleared (solved) by arrest when at least one person involved in the commission of the offense is: arrested; charged with the commission of the offense; turned over for prosecution.

Cleared by Exceptional Means-For UCR purposes, an offense is considered exceptionally cleared (solved) in those instances in which law enforcement has: definitely established the identity of the offender; enough information to support an arrest, charge, and turn over to the court for prosecution; knowledge of the exact location of the offender so that the subject could be taken into custody; some factor outside their control precludes arresting, charging, and prosecuting the offender.

Crime Factor-Any condition which may affect the amount and type of crime that occurs in a geographical area.

Crime Index-The sum total of seven major offenses used to measure the extent, fluctuation and distribution of crime in a given geographical area. Crime classifications presently used in the index are: murder; rape; robbery; aggravated assault; burglary; larceny; motor vehicle theft. Note that although arson is considered an Index Crime, the number of these offenses reported is not included in the calculation of the Crime Index.

Crime Rate-Crime rates are indicators of reported crime activity standardized by population.

FBI-Federal Bureau of Investigation, a division of the U.S. Department of Justice and administrators of the National Uniform Crime Reporting Program.

Hierarchy Rule-A standard UCR scoring practice in which only the most serious offense is counted in a multiple offense situation. For the Index Crime hierarchical order, see the Index Crime entry.

Hotel Rule-Burglaries of multiple hotel rooms, and other buildings intended to house transients are counted as a single incident.

Incident Based Reporting-A less restrictive and more expansive method of collecting crime data (as opposed to Summary Reporting) in which all the analytical elements associated with an offense or arrest are compiled on an incident by incident basis, also referred to as NIBRS - National Incident Based Reporting System.

Index Crime-Any one of eight major offenses used to measure the extent, fluctuation, and distribution of crime in a given geographical area. The seven index crimes are: murder, rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft. When the crime of arson is included, it is referred to as the Modified Crime Index.

Justifiable Homicide-The killing of a felon (while the subject is in the act of committing a felony) by a private citizen or police officer in the line of duty. Justifiable homicides are unfounded murders and are not counted as part of the sum total of murders reported in the Crime Index.

Law Enforcement Employee Rate-The number of full-time personnel (sworn and civilian) employed for each unit of population (per 1,000 in this publication).

n-The number of reported offenses.

N/A-Not Applicable. This abbreviation is generally used whenever a reasonable crime rate or percent change could not be calculated.

Part I Offenses-The first of two main groupings of UCR crime classifications consisting of the seven Index Crimes, arson, manslaughter by negligence and human trafficking. Part I offenses are by their nature generally more serious and/or occur more frequently than do Part II offenses.

Part II Offenses-The second of the two main groupings of crime classifications consisting of all other crime categories not already designated as Part I, excluding minor traffic violations. Part II offenses are generally less serious in nature and/or occur less frequently than the Part I offenses. Monthly tabulation of Part II offenses is limited to arrest information only in the Summary Reporting System, with the exception of simple assault.

Property Crime-Any one or the sum total (less arson) of the following offenses: burglary; larceny; motor vehicle theft; and arson.

Scoring-Counting the number of offenses committed after the police investigation report has been classified.

Structure-For UCR purposes, generally any enclosed area that has four walls, a roof, and a door that is permanently fixed. A "structure" is considered to include the following, but not limited to: a dwelling house, apartment, out building, public buildings, offices, factories, etc.

Summary Reporting-Summary reporting agencies provide reports on Part I offenses known to law enforcement and reports on persons arrested.

Unfounded Offense-A record of complaint which is found to be false or baseless after police investigation. The number of these complaints received is not included in the actual number of offenses reported or used in the tabulation of the Crime Index.

Violent Crime-Any one or the sum total of the following offenses: murder, rape, robbery, and aggravated assault.

UCR-Uniform Crime Reporting.
