

**SURCHARGE FEE CALCULATION**

Conn. Agencies Regs. § 28-24-8(a) prescribes a progressive wireline service schedule that is used by the Authority when calculating the E-911 monthly assessment fees for customer accounts with multiple lines. Pursuant to Conn. Gen. Stat. § 16-256g, the E-911 surcharge progressive rate schedule does not apply to wireless services. The regulation provides that if the number of access lines:

- equals one, then the assessment factor shall be 1.0;
- equals two, then the assessment factor shall be .75;
- equals three, then the assessment factor shall be .67;
- equals four or five, then the assessment factor shall be .60;
- equals six, seven, eight, nine or ten, then the assessment factor shall be .50;
- equal to or greater than eleven but less than 26, then the assessment factor shall be .40;
- equal to or greater than 26 but less than 51, then the assessment factor shall be .33;
- equal to or greater than 51 but less than 100, then the assessment factor shall be .25; and
- equal to or greater than 100, then the assessment factor shall be .20.

Based on DESPP’s Operating Budget, the estimated number of subscriber lines, and the assessment schedule in Conn. Agencies Regs. § 28-24-8(a), all incumbent LECs, CLECs, CMRS, COCOT, VoIP, and wireless subscribers shall be assessed a per-line monthly fee in the following amounts:
