Updates to “Audio and Visual” Location

Many of you have already received the communication from CMS about an additional code being available as a location for all “audio and visual” services. Based on that communication, we made some changes in DDAP by splitting up the existing location that goes along with all “audio and visual” services. Currently, you will see these two options in DDAP:

Audio and Visual Client in Other Location - 02

Audio and Visual Client at Home - 10

Please update your Electronic Health Records to correctly reflect these changes.

Still have Questions? Please contact:
