

Addendum #: 1

Issued: September 24, 2026

Request for Proposals (RFP): DMHAS-SWS-HOUSING-H2H-2026

Subject: Program Transition, Funding Redistribution, and Service Model Clarification

This Addendum is issued to clarify the intent and operational expectations related to the transition of current *scattered-site Permanent Supportive Housing (PSH) services* and *Homeless to Housing (H2H) services* under this RFP.

1. Purpose and Funding Redistribution

The RFP is designed to support the equitable redistribution of current funding across the state. Allocations are informed by the annual Point in Time (PIT) count and existing voucher program distribution. PIT data provides a one-night statewide estimate of homelessness and is used to identify trends, plan services, and guide resource allocation.

2. Statewide Transition to the H2H Model

This RFP transitions *scattered-site PSH services* and *H2H services* to a standardized H2H model statewide. The model includes outreach, engagement, housing location, stabilization, and ongoing case management. Service intensity may increase or decrease based on individual need and may include both pre-tenancy and tenancy-sustaining supports.

3. Client Continuity and Transition Timing

All current PSH scattered-site clients will have the opportunity to transition seamlessly to the provider(s) awarded in their region. Transition periods are anticipated to commence in Spring 2027, subsequent to execution of contracts.

4. Coordination and Continuity of Service

The DMHAS Housing and Homeless Services Unit will collaborate with existing and newly awarded providers to ensure uninterrupted services. Transition activities will include case conferences and direct provider-to-provider meetings. Proposers must include a transition plan for current PSH scattered-site and H2H clients and providers within their proposal.

5. Exclusion of Single-Site PSH Funding

PSH single-site funding is not included in this RFP. Program termination letters issued as part of this process do not affect any single site PSH services identified in DMHAS contracts and in the DMHAS Data Performance System (DDaP) as Supportive Housing, Development Level of Care.

6. Program Identification

Only scattered-site PSH and H2H programs are subject to this RFP and the corresponding termination letters. Termination letters are intended to reference only the DDaP numbers and program names associated with these scattered-site PSH and H2H programs.

7. Program Funding Sources

This RFP includes State-funded programs as well as supportive service programs funded through the U.S. Department of Housing and Urban Development (HUD).
