

Women's Specialty Programs

The programs listed in this brochure are designed to support the unique needs of women as they navigate their recovery journey. We offer a continuum of care to meet individuals at different points in this process. There is no wrong door to access help. As part of this continuum, DMHAS offers specialized services to individuals who may be pregnant/parenting. These programs are able to admit children with their parent.

Women's REACH

The Women's REACH (Recovery, Engagement, Access, Coaching & Healing) program is staffed by Women's Recovery Navigators and a Family Recovery Navigator who bring their lived experience to help support other women and families through case management and recovery coaching approaches. There is no wrong door to access REACH services. Services are voluntary.
