D. Home Management		
Intermediate		
Knows how to use vacuum cleaner properly and	"Cleaning My Place" M-6	
change bags		
Knows how to change bed linen	"Cleaning My Place" M-16	
Knows how to prevent sinks and toilets from	"Cleaning My Place" I-2, I-3	
clogging		
Knows how to sweep floor and stairs, wash wood	"I'm Getting Ready" C-2-2, C-2-4	
and linoleum floors, wash windows, dust, polish	"Cleaning My Place" M-11, M-14	
furniture, clean toilet/tub/sink, etc.		
Knows appropriate cleaning products to use for	"Cleaning My Place" M-8, M-9	
different cleaning jobs		
Knows how to defrost a refrigerator if necessary	"Cleaning My Place" I-4, I-6	
Knows how to clean a stove	"Cleaning My Place" I-5, I-6	

SHOW HOW TO USE ONE!

Check the following vacuums that you have u	sed, Circle the	ones you changed dust bags or
filters in upright with disposable paper dust bag		canister
cordless hand vac		electric hand yac
car vac		wet/dry shop vac
central vacuum system		water-filtration upright
??? Discuss:		
 What were the advantages of the ones you u. 	sed?	•
2. Were there problems as you used them?		
3. Can you teach someone how to use any of the	he ones you ch	ecked off?
4. What are some ways you can cause an accid		g a vacuum?
What are some ways you can harm your vac	aum?	
Observe, explain, or demonstrate how to use a vidirections of the manufacturer.) You can do this following information. If you demonstrated, har this sheet. You can use the back of this sheet to	in a classroom ve the person t	or at home. Complete the whom you demonstrated, sign
Type of vacuum cleaner:		•
Type of dust bag or filter:		
Check the features that the vacuum has:		
suction adjustment	on/off	switch on handle
adjustable brush height	on/off	switch on base of vacuum
disposable bag	varyin	g speeds
water filter	stiff pl	astic dust catcher
Other features:		
Where was the cord storage located?		
List attachments available:		
Did you try the attachments?		
What problems did you have?		
What safety suggestions do you recommend	17 (Use back	of sheet.)
Demonstrated to:	_ Date	Signature

DEMONSTRATE HOW TO MAKE A BED!

Make a demonstration bed

- 1. Find a box or book that is about 8x10x2 or 8x10x1 inches big. This will be your demonstration "bed"!
- 2. Find two men's handkerchiefs or cut fabric into 15x15" squares. These will be your "sheets"!

NOW "MAKE THE BED" as you would a "real" one....

Method # 1: "The Tuck-as-you-walk Method"

(This is used by motel professionals.)

- 1. Place the two "sheets" on top of each other on the "bed".
- 2. Fold the top sheet down so that it can cover a blanket's edge when you use one.
- 3. Tuck the lower sheet under the mattress all across the top of the mattress.
- 4. Tuck the top corner in. (You can use a military fold if you know how.)
- 5. Continue tucking both "sheets" under the mattress as you walk around the bed,

Method #2: "Creating a Bottom-fitted-sheet Method"

- 1. Place one "sheet" on top of the "bed".
- 2. Tuck the sheet under the mattress on all sides. Try to do it evenly so it doesn't come out on any side. (If you have a real fitted sheet for the bottom sheet of your bed, you just put it on before you put on the top sheet.)
- 3. Place the other "sheet" on top of the "bed".
- 4. Fold the top "sheet" down so that it can cover a blanket's edge when you use one.
- 5. Tuck the sheet in at the bottom corners and the bottom of the mattress. Leave the side edges hanging free.

Further information to discuss:

- 1. What are the advantages and disadvantages of using fitted sheets? (i.e. Advantage: Ease of use. Disadvantage: Lower sheet takes greatest wear and can only be used on the bottom.)
- 2. What are the advantages and disadvantages of using a comforter? (i.e. Advantage: Can serve as a blanket. Disadvantage: May cost more than a blanket.)
- 3. How often should linens be changed?
- 4. What sizes of sheets are available?
- 5. How do you judge quality of sheets?

HELP! It Needs Fixing!

Check one of the following items to be represented the item.	oaired and explain or demonstrate the process of
clogged toilet	clogged sink overflowing toilet
 ??? Questions to be answered before Should the landlord be notified? Why should you check a lease before What safety measures should be taken What caused the problem? How could this repair have been avoid 	making repairs? a to avoid an accident?
Equipment Needed	Products Needed
Steps to take to repair the problem:	

WHAT DO I DO NOW?

Role play the following situations:

- You and your roommate broke a window when playing basebail. You make a plan to contact
 your landlord to get it repaired.
- 2. You and your roommate found the kitchen sink clogged after a party you gave. You try using a plunger without success. You decide what to do.
- 3. You wake up in the morning. When you get out of bed, you step into a puddle on the floor! You look at the ceiling and see drops of water falling into the puddle. You find something to put under the leak and decide what to do about the problem.

??? Discussion questions for each of the skits above
Do you agree with the plans made by the roommates?
With what parts of the planning steps do you disagree?
What kind of new problems could be caused by the actions the roommates wanted to take?
Which of these problems could the roommates have solved without the landlord's help?
Which problems may need the help of the landlord?
What are the steps to take when informing a landlord of a problem?

NOW write a letter of complaint to a landlord about the following situation:

The banister leading from the basement to your apartment has broken off. You talked with the landlord four weeks ago about the problem. The banister is still not repaired. You are concerned about falling onto the cement floor while carrying your laundry to the basement.

TEACH SOMEONE TO CLEAN

What I want to include:	 Cleaning products to be used Supplies needed Safety warnings Process of cleaning

BASIC CLEANING PRODUCTS I WANT TO HAVE ON HAND

`		
 <u> </u>		
 	•	

3. Compare the value of natural cleaning products such as vinegar, ammonia, and bleach to disinfectant solutions.

???

What cleaning products should not be mixed?

Where should cleaning products be stored?

What safety precautions should you take?

How should you get rid of left-over cleaning products?

Why is it important to read labels carefully?

WHAT DOES THE PACKAGE TELL YOU?

Read information on a cleaning product and answer the following questions.

Name of product	Cost
Net contents	Size of nackage
Type of product	
Address of manufacturer	
Phone number of manufacturer	
Product claim	
Is trademark registered?	Is there indication of for use in Jewish homes?
Production code	Dating
List of ingredients	
With what products should product	ct be used?
Williams to be used	
What are other possible uses?	
Closing of package and storage s	uggestions
Other information found on pack	kage
Where have you seen this produ	ct advertised?

RX for Ranges

Fried hamburgers and pizza spillovers spell out messes for the range. If the range doesn't receive immediate attention, the problem grows worse....and harder to remedy.

If you need to clean a range, what process would you use? (You can explain or demonstrate.)

Be sure to use an instruction book if one is available.
