STATE	CROP	CENSUS.
-------	------	---------

STATE CROP CENSUS REVEALS LIGHT HARVEST PROSPECTS.

The Connecticut Crop Census, taken by L. H. Healey, Secretary of the State Board of Agriculture, which is released through their Marketing Bureau, shows that the hay crop is considered nearly normal throughout the State, that peaches are abundant in the principal frait growing sections, but apples and potatoes are short of expectations a month ago, and a light crop is 2.15 in evidence.

The final returns of the August census indicate that the hay crop will approach 92-94% of a full crop; peaches 55-60%; potatoes 83-35% and apples 34-40% of normal harvest.

The results obtained are not forecasted from a few farmers' observations, but represent reports made to The State Board of Agriculture in response to several inquiries covering the best farms in each county.

Cold weather reversed fruit growers' outlook on the lapple crop, even though one of the heaviest blooms of I fruit trees ever experienced was in evidence this year.
Peaches were generally damaged in the upper counties,
but three of the lower counties escaped with a fair

Where spraying was conducted thoroughly the potato crop is reported as being in good shape, but dry weather

reduced the early crop seriously.

Most of the hay crop has been harvested and several counties report 90% of this year's crop under cover.

# MARKET CONDITIONS IN HARTFORD:

HARTFORD, August 5. Potato prices are advancing steadily on the Hartford market, as well as other city markets throughout the state. This is due to the light crop of early potatoes and a scarcity of shipped-in stock at the present time. Peaches were more plentical today and a wider way. stock at the present time. Peaches were more plentiful today and a wider range of prices was recorded. Small peaches are selling as low as 60c per basket, while extra fancy stock ranges generally from \$1.50 to \$1.75 per 14-quart basket. The butter market is higher, but the tendency of all meat products is toward lower ranges. The poultry market records sales of Connecticut newlaid fancy eggs as high as 60c per dozen wholesale, but the market ranges generally at 56-58c per dozen.

MARKET CONDITIONS IN NEW HAVEN:

NEW HAVEN, CONN., August 5. The potato market
is a great deal higher than previously reported. A
light supply sold as high as \$2.25 per bushel this
morning. Long Taland potators are quested as high as morning. Long Island potatoes are quoted as high as \$6:00 per barrel, advancing 50c above yesterday's market. Native Gravenstein apples are wholesaling as high as \$1.75 per 14-quart basket. The cabbage market is higher.

# MARKET CONDITIONS IN BRIDGEPORT:

BRIDGEPORT, CONN., August 5. Both the tomato and sweet corn markets were easier today, as supplies and sweet corn markets were easier today, as supplies; were somewhat more liberal. On sweet corn, the prices quoted are for the bulk of sales; there is some fancy quality corn being brought in which is selling as high as \$3.00 per 100 ears. The potato market was higher. Broilers were not coming in as freely as the market demanded, there being an active demand for them. There was a firmer feeling on both the butter and egg market, butter prices advancing about 20 a pound in market, butter prices advancing about 2c a pound in the last two days.

# MARKET CONDITIONS IN WATERBURY: 1.95 2.05 2.25 2.40 GLUTEN-(100 lbs.)

WATERBURY, August 4. The demand for native vegetables was active today. Tomatoes were selling at higher prices than previously quoted. Sweet corn prices continue mostly unchanged, with an active demand for cabbage, beets, and apples. The egg market remains firm, and the bulk of sales today were at 55c. The hay market continues firm at prices quoted.

WHOLESALERS and GROWERS

# STATE PEACHES MOVE.

# Growers Expect Half-million Baskets.

ELBERTA SEASON WILL START EARLIER.

Reports from several fruit growers who are marketing a good crop of peaches this year indicate that the commercial crop of peaches will approach a half million baskets. Growers in the neighborhood of Hartford expect to harvest 70,000 baskets of the late canning peaches, while the crop which will contribute to the New Haven market is estimated at fully 150,000 baskets if it reaches the level of other peach years. Replies from several small orchardists indicate heavy crops which will be marketed locally or to a direct trade along roadsides. trade along roadsides.

The peaches on the market at present are mostly the Waddell and Carman varieties. Orchardists say that they expect to market Elbertas about the 25th of this month for Hartford market, while the Belle of Georgia peaches are reported as progressing slowly and will not be ready before the 18th of August. 'Growers along the lower counties expect to market peaches from three days to a week earlier than from Hartford county orchards. orchards.

# MARKET CONDITIONS IN HARTFORD:

HARTFORD, August 8.—Tomatoes and peaches are starting the market week with a heavier supply and lower prices. Lettuce, potatoes and lima beans are higher but good quality. Apples are in demand. Beef prices are slightly higher as well as the top grades of lamb. The supply of good quality sweet corn is more liberal and growers are making their first pickings of the mid-season varieties.

### MARKET CONDITIONS IN NEW HAVEN:

NEW HAVEN, August 8.—The potato market holds to a firm range and good cobblers are moving at \$2.00-2.10 per bushel. Apples of good quality are scarce with sales active at \$1.50 per 14 quarts. Native tomatoes are in good demand at 50c to 60c for ordinary stock, but fancy Stone tomatoes are wholesaling as high as 75c per basket. A few Clapp's Favorite pears are bringing \$1.50 per 14 quarts. NEW HAVEN, August 8.--The potato market holds

# MARKET CONDITIONS IN BRIDGEPORT:

BRIDGEPORT, August 8.—The potato market is stronger with prices advancing to the \$2.25 mark per bushel on good cobblers. The market was supplied with a liberal quantity of ordinary stock, which is evidence that the crop in some cases is a poor one. There were not enough native peaches on the market to quote, but a few native Carmans were selling from \$1.50-\$1.75 per 14 quart basket. Tomatoes and sweet corn were fairly liberal in supply, with prices about the same as at the close of last week. There were some growers beinging in awest corn of extra fancy quality and sellbringing in sweet corn of extra fancy quality and selling at \$3.00 per 100 cars. Some egg dealers were advancing prices on all grades of eggs from 1c to 2c above previous prices.

#### State Has Sixty Fairs.

The Hand Book of Fairs and Dates for 1921 is ready for distribution. Copies will be sent upon application to State Board of Agriculture, Room. 62, State Capitol, Hartford, Conn. The dates of sixty fairs are listed, as well as their officers.

### SUMMARY OF RECENT SURVEY.

This indicates the spread in conditions on farms i

the several counties.

The average and general conditions will be give out as soon as tabulated.

Following are details of returns from the eight

counties:

HARTFORD COUNTY. APPLES, 20 to 25% of crop. PEACHES, 75 to 100% all good. POTATOES—all report poor—50%. HAY, 70 to 100% of a crop, an 50% harvested. Some spoiled by poor weather, N damage by hail to fruit.

NEW HAVEN COUNTY. APPLES, 10%. PEACHES 125 to 100% of a crop—good quality. POTATOES

NEW HAVEN COUNTY. APPLES, 10%. PEACHES 125 to 190% of a crop—good quality. POTATOES 1100%. Some have been sprayed five times. One part has 30 acres. HAY, 100% crop, 95% harvested.

NEW LONDON COUNTY. APPLES, 25 to 75% PEACHES, 75%—good fruit. POTATOES, 50% HAY light to 70%. Much yet to cut.

FAIRFIELD COUNTY. APPLES, 25 to 70% of crop. PHACHES, 5%. POTATOES, early ones failure, late 50%. HAY, 190%, with 20% yet thervest. harvest.

WINDHAM COUNTY. APPLES, 20%. 2%. POTATOES, 65%. HAY, 90% crvested. Some hurt in getting.
LITCHFIELD COUNTY. APPLES, 20%. APPLES, 20%. PEACHER HAY, 90% crop, 95% has

none by those to whom we phoned. POTATOES, 50% HAY, 100%. One party cutting 300 tons.
MIDDLESEX COUNTY. APPLES, 0 to 100% of

PEACHES, good. Crop from 60 to 100%. Growers in Durham damaged 50% by hall. Some damage in Middlefield. POTATOES, not looking good; 50% of a crop HAY, 90 to 100%. Some spolled in gathering; 90% parvested. harvested.

TOLLAND COUNTY. APPLES, 1000 POTATOES, 50%. HAY, 100% crop, 90% ha

#### MARKET CONDITIONS IN WATERBURY

WATERBURY, August 9.-Today was one of the b , days of the season on the morning wholesale mark days of the season on the morning wholesale markethe attendance of growers being very large and native veretables and fruits of, all kinds in liberal supply. Tomatoes and corn were the products in most abundate supply, and prices on both were below any previously. The tomato supply continues to be made to largely of Earlianas. Peaches were arriving most freely today than previously, and more were being so at the lower quotation than the higher. Pointo price advanced ugain, reaching \$2.40 per bushel in son cases. Egg prices were mostly unchanged with the lower quotation being more common than the higher on Connecticut newlaid. on Connecticut newlaid.

### MARKET CONDITIONS IN NEW HAVE!

NEW HAVEN, August 9.—Potatoes are general higher with very light supplies in market. Peach are much heavier in supply than yesterday, and low priced. Tomatoes of much better quality are arriving and selling as low as 50c per basket for good quality stock. Fancy desert tomatoes still command 60c-71 per heaket the ton geotetian representing extra quality. stock. Fancy desert tomatoes still command of the per basket, the top quotation representing extra qualifying tomatoes demanded by hotels for immediate us. The butter market continues to advance, and newla eggs are freely reported at 60c per dozen, wholesal A wide range in quality of western eggs is noticed. Fancy fresh western eggs in cartons wholesale free for the per dozen. 45c-49c per dozen.

# TOMATO CANNING

# Marketing Bureau Abvises Housewives To Start Canning.

The tomato crop in Connecticut is two weeks ahead of the flood season last year. Prices have declined during the last few days, and the product has now reached a point where the consumer should be advised to perform home-canning work. In a very short time peaches for canning will be ready, and it is advisable to get the tomatoes canned and out of the way so the housewife may have "clear sailing" to handle the abundant peach crop. Undoubtedly tomatoes will sell for less money at a later date, but for home-canning they are at their best now, and a few cents' difference in the price should not delay this work at the expense of quality.

### MARKET CONDITIONS IN BRIDGEPORT:

BRIDGEPORT, August 10.—Potatoes were firmer today, although prices on this market had not advanced to as high a level as on some other markets of the state. Tomatoes and peaches were arriving quite freely. Prices on both products were lower than earlier in the week. Peach prices in particular were considerably below those previously quoted, as supplies from nearby orchards were considerably increased. Corn was mostly unchanged. The live poultry market took on a decided weaker tone owing to the slowing up in buying of the Hebrew trade during their holidays of this week.

#### MARKET CONDITIONS IN HARTFORD:

HARTFORD, August 10.—An increased supply of tomatoes has caused a decline in prices. Growers are marketing first quality tomatoes for 40c-50c per basket with a few extra fancy selling at 60c-65c per 14-quart basket. Peaches were very liberal in the market and range wide in price. No. 1 Carman preaches are whole-saling for \$1.00-\$1.85 per 14-quart basket; inferior grades sell as low as 50c per basket, and a light supply of Champion peaches of extra fancy quality brought as high as \$1.50 per basket. Lima beans and potatoes are scarce and higher priced. Prime beef is scarce and the market inclined higher. At the present time the whole-sale meat markets have a liberal supply of veal. The apple market holds steady, and fancy Gravensteins are bringing as high as \$1.75 per 14 quarts, while windfall apples are finding a poor market at 40c-75c per 14-quart Cantaloupes are lower priced.

# CROP REVIEW

# Year's Condition and Acreage Below Last Says U.S. Report

CROP CONDITIONS, AUGUST 1, 1921.

The United States Buureau of Markets and Crop stimates, in its general review of crop conditions agust 1st, credits Connecticut with a combined condi on of all crops (100-average) of 95.2% since July 1st the exception of Maine, where a very slight de is recorded, crops throughout New England show the is recorded, crops throughout New England show increase in condition above July 1st. Connecticutally Onions have been cut short with records of nover 50%, normal growth. New England Hay is better an expected last month; the cat and corn crops are protted as fair to good crops. The potato crops proughout the country is forecasted as being the ghtest since 1916. The Maine crop is not quite up to ormal, with the rest of New England uneven, fair to good. eod.

# MARKET CONDITIONS IN BRIDGEPORT

AIDGEPORT, August 15, 1921.—The market was her quiet today, with few growers in evidence and yers not very active, which is a normal Monday forning condition. Prices are mostly about the same at the close of last week's period. Tomatoes are enewhat weaker, with few sales being made at the part of the market firm at advanced prices. There appears the market firm at advanced prices. There appears the market than last week he market firm at advanced prices. There appears to be more fancy apples on the market than last weel few Rochester and Early Crawford peaches are beginning to appear, and they are bringing fancy price while Carman peaches were draggy today. The happear is compared to support and prices firm. harket is somewhat higher and prices firm.

### MARKET CONDITIONS IN HARTFORD:

HARTFORD, August 15, 1921.—Tomatoes evidently to hit the bottom of the market for the season, with the ranging from 40c-50c per 14-quart baskets for 1 grade. A few sales were reported at 55c-65c per parkets a proportion of one package to one hurted selling at 40c-50c. Tomatoes that are poorly readed are generally selling at 35c per pasket. Limited are generally selling at 35c per pasket. Limited are generally selling at 18c-20c per dozen the bulk of sales at the lower figure. Several large of the bulk of sales at the lower figure. Several large of the bulk of sales at the lower figure. Several large of sales are through with early potatoes. Prices of say's market include New Jersey stock selling at 15 per 2½ bushel sacks. The apple market is defedly firm, with a general scarcity of colored stock sches of good quality were only moderately effective and the same stock of sold aches of good quality were only moderately effective are the center of attraction. A few native must have said at \$1.75-\$2.00 per dozen. HARTFORD, August 15, 1921.-Tomatoes evident

HARTFORD, CONN,

FRIDAY. **AUGUST** 19 (92) No.

# PRODUCE SUPPLIES HEAVY, Waterbury Bridgeport

# Home-grown Vegetables and Fruits at Mid-season Flood.

Mome-grown fruits and vegetables of the d-season varieties are practically at season's ght, and the best quality tomatoes, sweet in and lima beans are now coming in. Many rowers say that the height of the tomato parketing season is here, and that in a few ays supplies will be lighter. The intermission between the early varieties of peaches and the late canning varieties is causing a decrease in supply, and consequently better demand for fancy varieties. The start of the canning peach season is expected next week.

During the past week the newlaid egg market held firm, with slight advances re-corded in several cities. Receipts of shippedin eggs continue heavy, but they are not bringog prices set by the owners, consequently they going into storage. The live poultry going into storage. And the gold together with coilers, as well as fowl, coupled together with a slow demand, made an unsatisfactory market.

Home-grown vegetables, with the exception of tomatoes, are selling well. The restaurants in several places are putting an ear of corn out at 5c each. This has tended to popularize sweet corn. The consumer has accepted the price of tomatoes as satisfactory for the canning program, and the supply of good stock cleans up aily, leaving the cults and poorly graded to-tatoes at the mercy of the market.

The meat markets are holding generally ready around the State. Veal has been very dentiful during the past week, and heavy grades of native calves were not in very good demand. Western beef prices are slightly higher, but the price on medium grade beef and native cows is slightly easier. With the exeption of slight advances in the hay market, other feeding products remain practically un-

Do not longer delay your fall seeding. The sooner get it done the better it will withstand the winter's
