

Department of Agriculture Horses Available for Adoption as of 7/5/18

Cheyenne is a Mustang mare 16 years old and 14.1 HH. She has a neurological issue that prevents her from being ridden. She would be a great pasture pal for your horse.

Isis is a beautiful Arabian mare about 28 years old. She stands for the farrier and vet. She is green broke and the favorite personality of all the barn workers. She loves to be around people!

"Blaze" is a chestnut Quarter Horse gelding about 24 years old. You'd never guess his age because he acts much younger. Because of ringbone in both front feet, he needs frequent farrier care and only light riding, if any. He would be a great companion to another horse or a lovely pasture ornament. "Blaze" has a trick he likes to perform – he enjoys swinging a lead rope around by holding it in his teeth. His new home will need to provide him with plenty of lead ropes so he can entertain people and keep himself busy.
