Access to SELECTSeries CAD Standards
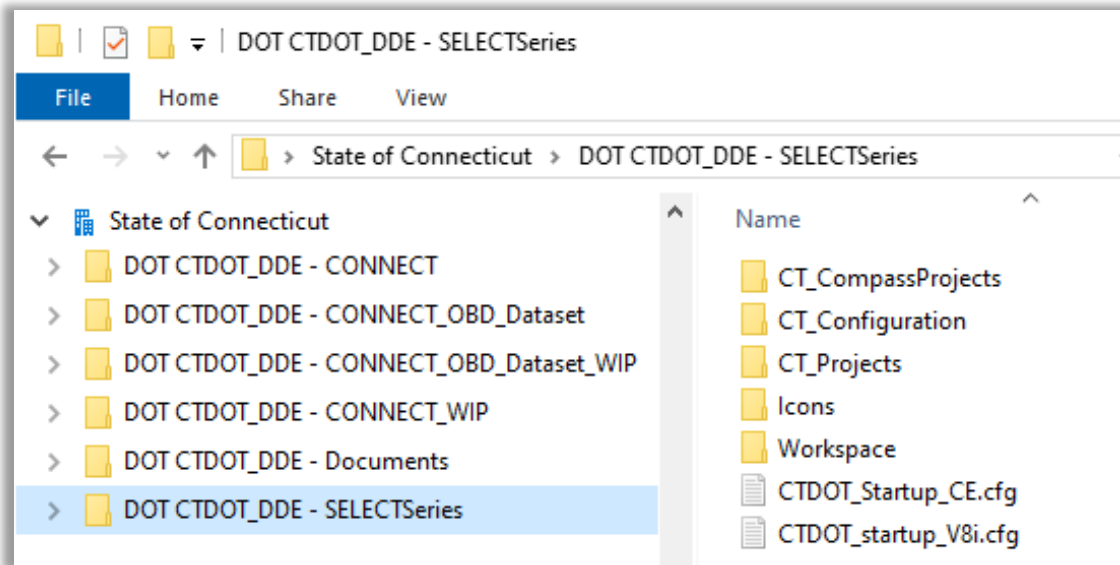

AEC Application 09/12/2024

Introduction

MicroStation and InRoads have been removed from most computers, the old CAD SELECTSeries Standards (levels, cells, line styles and annotations) have been configured to open with OpenRoads.

Please note:

- This environment has not been set up to process Openroads 3D design surfaces, corridors, or drainage. Users will need to access the CONNECT Edition Workspace (DDE) to create 3D designs. This set up will primarily be used to update 2D design models and sheets for Design Initiated Change Orders or to update the Traffic Signal Inventory.

- Survey can use this environment to process AI's to create existing terrains and ground files using the old levels, cells, line styles and annotations to match legacy DGN files with OpenRoads.

- CAD Accounting will not be used as the access point, users will open OpenRoads through a special icon.

- There is a small group of users that may still have MicroStation V8i and InRoads on their computers. Access through CAD Accounting will be disabled, and a special Icon will be used for this scenario as well. This will enable users to still use the old InRoads tools.

- The legacy SelectSeries workspace is available to Sync from SharePoint.

Getting Started

1. In **File Explorer** check to see if the SELECTSeries workspace is already synced.

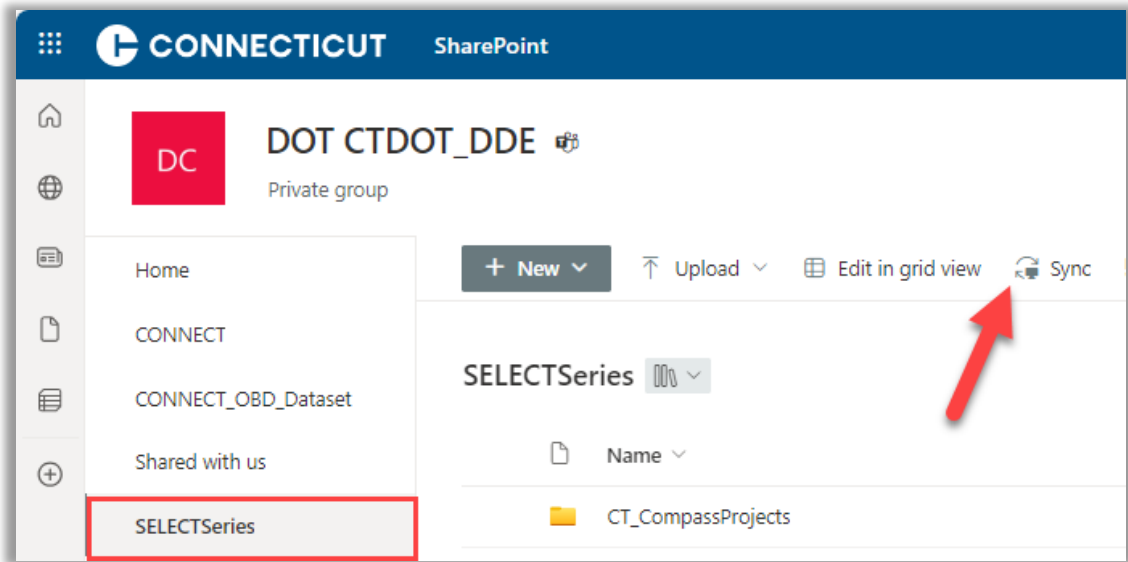

2. If it is not listed, you will need to Sync the workspace at this time. Browse to the **DOT CTDOT_DDE** SharePoint page, and from the left menu select **SELECTSeries**, or click the following link:
https://ctgovexec.sharepoint.com/sites/DOTCTDOT_DDE/SELECTSeries/Forms/AllItems.aspx

3. Select the **Sync** button.

4. In **File Explorer** browse to *....State of Connecticut\DOT CTDOT_DDE - SELECTSeries\Icons*.
    Copy the needed Icons to your desktop.
    - The **ORD SelecctSeries CAD Standards** icon will be used by most as this uses OpenRoads.
    - The **V8i SelectSeries Cad Standards** icon will be used by the small group of users that still has the old products loaded on their cmputers.

Access to SELECTSeries CAD Standards

## Access using the ORD SelectSeries CAD Standards icon

1. Double click on the **ORD SelectSeries CAD Standards** icon. On the Work Page select **Custom Configuration**.

    Users from **Design Units** should select:
    >WorkSpace: ***CT_SELECTSeries_Design***
   >WorkSet: ***0000-0000***
    >Role: ***Design***

    Users from **Survey Units** should select:
    >WorkSpace: ***CT_SELECTSeries_Survey***
   >WorkSet: ***0000-0000***
    >Role: ***Survey***

Access to SELECTSeries CAD Standards

2. Bring up the old **Tasks** menu, go to the **V8** icon in the top left corner and select **Dialog**.

Access using V8i SelectSeries Cad Standards icon

1. Double click on the **V8i SelectSeries CAD Standards** icon. On the open page ensure that **User** is **untitled,** and **No Project** has been picked. Browse to the DGN file you would like to open.
