#### Notice: Community Connectivity Grant Program Update 1/25/19

#### **CTDOT Announces 'Community Connectivity' Grants**

\$13.4 Million Will Support Projects in Towns and Cities

Connecticut Transportation Commissioner Joseph J. Giulietti today announced that towns and cities across Connecticut will receive \$13.4 million in funding under a grant program to construct projects that support pedestrian and bicycle safety, as well as improved accessibility in the state.

The "Community Connectivity Grant Program" (CCGP) is an infrastructure improvement program that seeks to provide construction funding for local initiatives that will improve the safety and accessibility for bicyclists and pedestrians in urban, suburban and rural community centers. These community centers serve as places where people can meet for employment, educational, social and recreational activities.

The CCGP is one component of the broader Community Connectivity Program. The primary goal of the program is to make conditions safer for people of all ages to walk, bike and take transit, thereby encouraging more people to use these healthy and environmentally sustainable modes of travel. At the same time, these improvements will make Connecticut's community centers more accessible places to live and work.

In 2017, the Connecticut Department of Transportation (CTDOT) solicited applications for grants from municipalities for projects that ranged between \$75,000 and \$400,000. A total of 80 applications were received. Every municipality in Connecticut was asked to submit one application. The first round of grants, awarded in fiscal year 2018, funded projects in 40 Communities. On December 11, 2018, the State Bond Commission approved additional funding for a second round of grants to construct the remaining 40 projects requested under the original solicitation. A list of the Communities receiving funding for the second round of grants, along with a brief description of the project, are as follows:

| Community | Brief Project Description   | Awarded<br>Amount |
|-----------|---|-------------------|
| Andover   | Andover Center Safe Transit Initiative – create a trail head for the Hop River Rail Trail | \$297,620.00      |
| Bethel    | Wooster Street Sidewalk Project   | \$349,000.00      |
| Bethlehem | Bethlehem Main Street Sidewalks   | \$300,300.00      |

| Bolton         Bolton Center Connectivity – various pedestrian upgrades and gravel path in town center         \$186,110.00           Bridgeport         Creating Bike Parking for Bridgeport         \$325,600.00           Bridgewater         Scingage, pavement markings for pedestrians         \$84,000.00           Brookfield         Still River Greenway – Town Hall Access         \$207,355.00           Burlington         Visibility Improvements Route 4 at Punch Brook/Barnes Hill Road         \$350,000.00           Canaan         South and East End Corridor Link Project – sidewalk         \$400,000.00           Cheshire         Sidewalk and Bike Improvements         \$386,100.00           Colchester         Colchester Town Green Bicycle and Pedestrian Improvement Project         \$397,300.00           Coventry         Main Street Sidewalk Extension         \$399,840.00           Cromwell         Main Street Sidewalk Extension         \$399,200.00           Deep River         River Street sidewalk connection         \$68,000.00           Durham         Main Street Sidewalks         \$400,000.00           East Windsor         Broad Brook Connection – paths to enhance pedestrian and bicycles         \$334,400.00           Guilford         Boston Street Sidewalk Extension         \$285,667.00           Haddam         Haddam Center Sidewalk Project         \$399,600.00  | Bloomfield  | Tunxis Avenue Sidewalk Extension                                  | \$266,000.00 |

# Notice: Community Connectivity Grant Program Update 9/21/18 GOV. MALLOY ANNOUNCES \$12.4M IN STATE GRANTS TO HELP TOWNS THROUGHOUT CONNECTICUT IMPROVE SAFETY AND ACCESSIBILITY FOR PEDESTRIANS AND BICYCLISTS

(HARTFORD, CT) – Governor Dannel P. Malloy today announced that 40 towns and cities across Connecticut will receive \$12.4 million in funding under a competitive state grant program that seeks to support pedestrian and bicycle safety and improve accessibility within urban, suburban, and rural community centers where people can meet for work, school, social, and recreational activities.

Administered by the Connecticut Department of Transportation (CTDOT), the Community Connectivity Grant Program seeks to make conditions safer for people of all ages to walk, bike, and take transit, thereby encouraging more people to use these healthy and environmentally

- sustainable modes of travel. At the same time, these improvements will make Connecticut's community centers more accessible places to live and work.
- "Modernizing and updating our transportation infrastructure including making accessible neighborhoods for pedestrians and bicyclists is critical if we want to have thriving towns where families want to live, businesses can flourish, and communities succeed," **Governor Malloy said**. "These grants are targeted toward strengthening our towns and cities and fostering growth in our local economies."
- "The objective of this grant program is to provide construction funding directly to municipalities for infrastructure improvements that are aligned with the overall program goals," CTDOT Commissioner James P. Redeker said. "We are excited to work directly with our municipalities to provide safer, more accessible travel for our residents."
- The grants were awarded on a competitive basis in a range between \$75,000 and \$400,000 based on applications that municipalities submitted to CTDOT. Municipalities were allowed to submit one application per community. CTDOT staff reviewed, rated, and ranked each of the proposals.

The grant awards announced today are as follows:

- **Ansonia \$385,000:** Main Street Multi-Modal Safety Improvement Project (sidewalks, bump outs, improve street lighting)
- **Avon \$378,512:** Old Farms Road Connectivity Improvements Project (Multi-use trail and RRFB on Old Farms Road, Scoville Road, and FCHT at Country Club Road, Scoville Road and Thompson Road)
  - **Berlin \$387,000:** Berlin Pedestrian Improvements Project (Sidewalks on Norton Road, Four Road, Farmington Avenue/Route 372, and Robbins Road)
  - **Bristol \$299,916:** Rolling Down the River (Bike lanes, wayfinding signage, ADA compliant ramps, sidewalks, bike parking on Memorial Boulevard, Riverside Avenue/Route 72, School Street, West Street/Route 69, Jacob Street)
  - Canton \$399,924: Canton Village Road Safety Improvements and Connections to Transit (Sidewalks on 178 Albany Turnpike and vicinity RSA study area; Route 565 from Commerce Drive to Route 44; Commerce Drive from Bart Drive to Route 565)
  - **Danbury \$400,000**: Westside Community Connectivity Project Saw Mill Road to Mill Plain Road to Farrington Woods Park (sidewalk, street lighting and sharrows)
- **Derby \$227,360**: Route 34 Pedestrian Safety Improvements (sidewalks, crosswalks, pedestrian signals on Route 34 at Gilbert Street and Bank Street, and Route 34 at Sodom Lane)
  - **East Hartford \$399,600**: Route 5 and 502 Intermodal Connectivity Project (sidewalks and crosswalk)
    - Ellington \$376,200: Ellington Town Center, Main Street West sidewalks
- Essex \$145,200: Completion Missing Links in Essex Town Wide Sidewalk Connectivity Project (Main near 76 Main Street, Essex Village and Champlin Square triangle near 2)

Wethersfield – \$393,300: Old Wethersfield Pedestrian and Bicycle Improvement Project (roadway and intersection improvements on Main Street, Marsh Street, Garden Street, Hanmer Road, Church Street and Nott Street/State Highway 422)

Windsor Locks – \$321,949: Windsor Locks Transit-Oriented Development Final Mile Connection (A Multi-Use Trail and Canal Crossing on Bridge Street/Route 140, Main Street/Route 159)

#### Notice: Community Connectivity Grant Program Update 7/27/18

The Department is pleased to announce that on Wednesday, July 25th, the State Bond Commission approved the Department of Transportation's request to fund the Community Connectivity Grant Program. All municipalities that submitted applications for grants will be formally notified as to their status very soon.

#### Community Connectivity Grant Program Update 5/22/18

The State Legislative session ended on May 9, 2018, which included an adjusted state budget for FY 2019. The Department is now evaluating how and when to proceed with the many programs that had been put on hold. We will provide you with more definitive information on the Grant program as soon as we can. Please keep in mind that the Community Connectivity Grant Program is subject to approval by the Bond Commission.

#### Community Connectivity Grant Program Update 12/14/17

The recently passed state budget has greatly impacted CTDOT's capital and operating budgets. Given the large reductions in funding, we are reassessing all operating and capital programs to determine what programs are critical to core functions like highway snow removal, and which programs and projects can be reduced and/or deferred.

The Community Connectivity is one of the programs being considered for deferral. As a result, we will not make project awards in the next few months. We are hopeful that some legislative action can be taken in the upcoming session to provide additional revenues to the State Transportation Fund. By June we should know what if any actions the Legislature will take to correct the funding problem, and will be able to provide you more direction on the status of your projects and the program.

Thank you for your patience and interest in the Community Connectivity Grant Program. We are hopeful that we can still advance this program that is so important to so many communities.

#### Community Connectivity Grant Program Update 11/3/17

The Department has completed the review of the Community Connectivity grant applications. Because this program is contingent on a state budget and allocation of funding by the State Bond Commission, we must wait to announce the results. While a state budget has

recently passed, at the time of this posting, we have not fully examined how it will affect the DOT budget. We also do not know when the next Bond Commission might be scheduled. Please continue to check back on this website for any updates. Thank you for your patience and interest in the Community Connectivity Grant Program and we

look forward to helping improve conditions for walking and bicycling within our communities.

## Connecticut Department of Transportation (CTDOT) announces the availability of the Community Connectivity Grant Program (CCGP)

The Community Connectivity Program is intended to improve conditions for walking and bicycling to and within Connecticut's community centers. Community Centers are defined as places where people from a particular municipality can meet for social, educational, employment or recreational activities. This program is one of the outputs from Governor Dannel Malloy's Let'sGoCT! Transportation initiative which addresses short-term and long-term transportation needs across the State.

Under Let'sGoCT!, the **Community Connectivity Grant Program (CCGP**) has been developed to provide construction funding for local initiatives that will contribute to reaching the overall goal of the broader Community Connectivity Program. Projects funded through the CCGP will allow municipalities to perform smaller scale capital improvements. The Department will administer the CCGP and will solicit applications for grants from municipalities. Grants will be awarded on a competitive basis and will range between \$75,000 and \$400,000.

The application deadline for the CCGP is <u>4:00 p.m. on Tuesday, August 1, 2017</u>. Each Municipality will be allowed to submit <u>one</u> application.

Guidelines for the program and an electronic application can be found by clicking on the tab above "CCGP" or <a href="here">here</a>. The Guidelines provide an overview of the CCGP and all the necessary details to complete an application for grant funding. Please note that this is a competitive process.

The CCGP is the second phase of the broader Community Connectivity Program. The first phase offered Connecticut's municipalities' assistance to conduct Road Safety Audits (RSA's) to examine safety issues and counter-measures to help improve safety and reduce crashes at important bike and pedestrian corridors and intersections. The RSA's began in the spring of 2016, and a total of 80 RSA's were completed over a period of twelve months. These reports can be accessed by clicking on the above tab "RSA Reports." It is important to note that having a completed RSA is not a prerequisite to receive CCGP funding.
