Highway Design Manual Revisions

The Department's Highway Design Manual (HDM) has been updated to reflect the following clarifications:

1. The definitions of "Low Speed" and "High Speed" roadways have been modified for consistency throughout the HDM.
2. Section 11-2.02 has been modified to provide additional guidance for intersection sight distance requirements from private driveways.
3. Figure 12-3B has been modified to include grade adjustments for deceleration lanes with grades greater than 4% to less than 5%.

The updated HDM is available on the Department's [Engineering and Construction Information Resources](#) web page.
