OEP Submittal Templates in the Updated Contractor's COMPASS User Manual

This bulletin is to inform users that there are now OEP Submittal Templates which are different from those of Landscape Design. These templates can be found on OEP's webpage under the [Environmental Resource Compliance section](#).

If a project has a Permit Planting Plan, wetland or tidal mitigation, planting submittals shall be sent to OEP. If the project has a Landscape Plan, submittals shall be sent to Landscape Design.

There may be large-scale projects where both will be needed.

Please use the most up-to-date [COMPASS Contractors User Manual](#).

If you have any questions, please reach out to OEP's Environmental Resource Compliance Transportation Supervising Planner.
