

**SECTION 2.13
GRANULAR FILL**

2.13.01--Description: This material shall be used as a foundation for structures, to replace unstable material in slopes, as a foundation for sidewalks and culverts, in shoulders and elsewhere as indicated on the plans, required by the specifications or ordered by the Engineer. It shall consist of gravel or reclaimed miscellaneous aggregate containing no more than 2 percent by mass of asphalt cement conforming to the requirements of these specifications.

2.13.02--Materials: Granular fill shall conform to the requirements of Article M.02.01

2.13.03--Construction Methods: When granular fill is used for foundation for structures or to replace rock or unsuitable material in trenches, it shall be deposited in layers not over 150 mm in depth, with each layer thoroughly compacted before the addition of other layers.

2.13.04--Method of Measurement: Granular fill will be measured in place after compaction within the payment lines shown or specified by the Engineer.

2.13.05--Basis of Payment: This work will be paid for at the contract unit price per cubic meter for "Granular Fill," complete in place, which price shall include all materials, tools, equipment and labor incidental thereto.
