

CONSULTING ENGINEERS
GENERAL MEMORANDUM 08-06

STATE OF CONNECTICUT
DEPARTMENT OF TRANSPORTATION
BUREAU OF ENGINEERING AND
HIGHWAY OPERATIONS
OFFICE OF ENGINEERING

Consultant Administration and Project
Development Manual (formerly the Consultant
Engineers Manual)

August 29, 2008

TO: CONSULTING ENGINEERS

This is to notify you that the Department of Transportation (Department) has replaced the Consultant Engineers Manual. The new manual can be found on line on the Department's web site (<http://www.ct.gov/dot/cwp/view.asp?a=2303&q=300828>). The title has been changed to reflect its purpose of outlining the project development process, as well as the consultant contract administration process.

The new manual incorporates issues distributed under previous Consultant Engineers General Memoranda including;

- 1) Work Zone Safety Requirements
- 2) Affidavits
- 3) Calendar Day Charts
- 4) Digital Design Environment
- 5) Stream Stats and Storm Culvert Selection

This update also addresses the need to more broadly consider alternate modes of transportation in the early design phase; adds emphasis to the important need to consider temporary property rights during construction; and clarifies issues associated with DBE participation.

If you notice errors or inconsistencies in the new document, please bring them to our attention, such that it can be corrected as expeditiously as possible. Thank you.

Very truly yours,

Thomas A. Harley, P.E.
Manager of Consultant Design
Bureau of Engineering and
Highway Operations
