Survey Highlights

CONNECTICUT DAILY TRAVEL SURVEY

Summary

The Connecticut Daily Travel Survey was a statewide household travel study conducted by CTDOT to understand residents' daily travel patterns and transportation choices. The 2024 survey collected representative travel data from more than 8,200 households and provided critical information for the update of the Statewide Travel Demand Model, which guides transportation investments and supports future infrastructure and funding decisions.

Note: A "tour" is defined as a sequence of linked trips for a person on any given day that start and end at home.

Survey Participation

- Invitation letters were mailed to 554,011 households.
- 8,268 households completed the survey.
