The purpose of this meeting is to provide the community with an opportunity to learn about the proposed project and allow an open discussion of any views and comments concerning the proposed improvements. A Q&A session will immediately follow the presentation.

This bridge replacement will address current structural deficiencies by improving safety and hydraulic performance.

Right-of-way impacts associated with the proposed project include temporary impacts for the removal of the existing structure, grading of slopes, and for in-water work. There will be permanent impacts associated with maintenance access around proposed guiderail.

Construction is anticipated to begin in 2028 based on the availability of funding. The estimated construction cost for this project is approximately \$3 million. This project is anticipated to be undertaken with 80% federal funds, and 20% state funds.

Members of the public can submit comments and questions during the two-week public comment period following the meeting.
