The purpose of this meeting is to provide the community with an opportunity to learn about the proposed project and allow an open discussion of any views and comments concerning the proposed improvements. A Q&A session will immediately follow the presentation.

The purpose of this project is to address the deterioration of the bridge by designing a new resilient replacement that meets all current design standards.

The right-of-way impacts associated with the proposed improvements are on private property and will consist of temporary construction easements for access, grading, and water handling, and a slope easement.

Construction is expected to start in 2028, depending on funding, right-of-way acquisition, and permits. The estimated cost is \$4 million, with 80% federal funds and 20% state funds.

The public can submit comments and questions during two-week public comment period following meeting. Direct comments and questions by February 10, 2026, to [DOT-FLBP@ct.gov](mailto:DOT-FLBP@ct.gov), 860-594-2020, or Hayley Martin at [Hayley.Martin@ct.gov](mailto:Hayley.Martin@ct.gov).
